

The image shows a factory environment with a blue color cast. In the foreground, two white industrial robotic arms are positioned, one on the left and one on the right. They are facing each other, and a bright orange spark or flame is visible between their grippers. The background is filled with industrial machinery, pipes, and structural beams, all slightly out of focus. A semi-transparent white rectangular box is centered over the image, containing the text 'ROBOTICS IN MECHANICAL ENGINEERING' in a bold, blue, sans-serif font.

**Smart Organizations in Industry 5.0** Sebastian Saniuk, Sandra Grabowska, Anna Adamik, 2024-12-31 The Fourth Industrial Revolution means the widespread digitization of economic processes using more economical and efficient production technologies Orientation towards productivity flexibility and low production costs results in a slow process of dehumanization of industry and focus only on implementing digital technologies of Industry 4.0 A natural consequence of this trend is the concern of workers governments and societies about new challenges and the role of humans in industry and the economy The hope is the emergence of a new industry concept proposed by the European Commission that expands the features of the existing Industry 4.0 concept to include human centric environmental and resilience aspects in smart organizations Industry 5.0 is an excellent alternative to the development of today's digital and dehumanized world and this book presents challenges and priority directions for smart organizations in an environment shaped by the pillars of Industry 5.0 This research volume discusses the development of technologies that support human oriented work systems sustainable production and system resilience in intelligent organizations It presents an educational challenge for universities and vocational schools in preparing employees for intelligent organizations and will be of interest to researchers academics
