understood and a step by step approach has therefore been used in presenting each section The test procedures comprise the measurement of soil permeability CBR value drained and undrained shear strength and consolidation characteristics Additional material in this new edition includes the Fall cone procedure for measurement of shear strength in clays based on the European Technical Specification a simplified direct approach and a useful arrangement for applying pressures in multistage triaxial tests to meet the requirements of BS1377 The latest requirements for calibration of equipment and measuring devices are presented and discussed together with the significance of quality assurance based on recognised laboratory accreditation to ISO IEC 17025 Descriptions of test methods are complemented by many numerical examples in order to illustrate the methods for recording test data making calculations presenting graphical plots and deriving test results Fundamental principles are explained where appropriate so that the operator can have a better understanding of the significance of the tests and guidance is given where experience has shown that difficulties may be encountered The importance of good techniques essential checks on test equipment and laboratory safety are all emphasised
