Adsorption Kinetic Equilibrium And Thermodynamic Studies:

Adsorptive Separation Process for Water and Gaseous Air Pollution Control Tushar Kanti Sen, 2026-01-22 Adsorption is one of the efficient cost effective separation processes that is in use for the removal of water and gaseous pollutants This book provides a balanced mix of fundamental adsorption theory and application with a compilation of up to date developments and trends It presents fundamental and advanced knowledge on solid liquid and gas solid separation unit operations and critically discusses the reaction based mechanism of adsorption and adsorptive parameters estimation Key Features Puts emphasis on adsorption for water and gas remediation reviewing state of the art of the technology as well as introducing beginners to adsorption Explores factors affecting the adsorption separation process including types of adsorbents and composite nano adsorbents Includes batch and continuous unit operation and design calculations Proposes development of a sustainable cost effective water filter including arsenic rich water purification Discusses utilization of industrial and agricultural solid waste in alternative adsorbents during solid liquid and gas solid separation This book is useful for researchers and graduate students in chemical and environmental engineering and analytical chemistry

Metals in Water Sushil Kumar Shukla, Sunil Kumar, Sughosh Madhav, Pradeep Kumar Mishra, 2022-10-15 Metals in Water Global Sources Significance and Treatment covers metal pollution in water where they come from their effects and remediation processes Sections overview heavy metals pollution including their global health impacts and remediation measures Geogenic and anthropogenic input of heavy metals in water are described along with global case studies step by step methods on remediation techniques different detection sensors and assessment practices of toxicity of heavy metals The book focuses on recent research surrounding heavy metals contamination in water resources and its impact across the globe Chapters incorporate both theoretical and practical aspects and serve as baseline information for water resources studies This book is useful for postgraduate students teachers and researchers working in areas of water resources and pollution hydrochemistry environmental remediation and toxicology who are looking to understand the affects metals have on water the environment and health and also those looking for methods for remediation Presents global case studies of sites contaminated by metals effects on the environment and successful remediation techniques Includes a whole section on remedial measures with clear step by step how to guides Provides chapters covering detailed biogeochemical processes

Algal Technologies for Wastewater Treatment and Resource Recovery Raul Muñoz, Hardy Temmink, Anthony M. Verschoor, Peter van der Steen, 2019-07-26 Over 80% of globally produced wastewater receives little or no treatment before it is disposed into the environment Therefore it is urgent to develop new wastewater treatment technologies that are sustainable in the broad sense of the word i e not only produce high quality effluents but also minimise energy expenses recover energy and nutrients and apply technology that is appropriate in relation to the availability of skilled personnel This book compiles the main outcomes of recent efforts to improve the design of waste stabilisation ponds and confirms the

superior performance of high rate algal ponds as a result of process intensification Anaerobic digestion devoted to biogas production continues to be the preferred strategy for the energy valorisation of the algal biomass co digestion with multiple high C N ratio substrates gathering significant attention over the past years The potential of algal biomass as a biosorbent for heavy metal removal Cu Ni F maintains its share in the research field of water bioremediation while research on nutrient removal has focused on providing new insights on the mechanism of nitrogen and phosphorus removal from wastewater in algal bacterial systems Finally it is worth noticing that breakthroughs in complementary fields of research such as nanotechnology or lighting technology are gradually being implemented in algal biotechnology with new products such as nanoparticles for water disinfection or photobioreactors illuminated by low intensity LED panels In Focus a book series that showcases the latest accomplishments in water research Each book focuses on a specialist area with papers from top experts in the field It aims to be a vehicle for in depth understanding and inspire further conversations in the sector

Electrolytes—Advances in Research and Application: 2012 Edition ,2012-12-26 Electrolytes Advances in Research and Application 2012 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Electrolytes The editors have built Electrolytes Advances in Research and Application 2012 Edition on the vast information databases of ScholarlyNews You can expect the information about Electrolytes in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Electrolytes Advances in Research and Application 2012 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>

Advancements in Multifunctional Composite Materials B. K. Behera,Masayuki Takatera,Rajesh Kumar Mishra,2025-01-13 This book presents select proceedings of the First Indo Japan Textile Research Conference IJTRC 2023 and provides a comprehensive exploration of the transformative field of multifunctional composites in materials engineering The book covers a wide range of topics such as 3D woven composites honeycomb composites woven spacer composites and textile structural composites It showcases the remarkable potential of these materials in various industries ranging from automotive to aerospace and from building construction to marine It also addresses important aspects such as textile waste management electromagnetic passivity and fire resistance This book serves as a valuable resource for researchers postgraduate students and professionals interested in staying at the forefront of multifunctional composite materials

Bioprocess Engineering Pau Loke Show,Chien Wei Ooi,Tau Chuan Ling,2019-05-24 Bioprocess Engineering Downstream Processing is the first book to present the principles of bioprocess engineering focusing on downstream bioprocessing It aims to provide the latest bioprocess technology and explain process analysis from an engineering point of

view using worked examples related to biological systems This book introduces the commonly used technologies for downstream processing of biobased products The covered topics include centrifugation filtration membrane separation reverse osmosis chromatography biosorption liquid liquid separation and drying The basic principles and mechanism of separation are covered in each of the topics wherein the engineering concept and design are emphasized This book is aimed at bioprocess engineers and professionals who wish to perform downstream processing for their feedstock as well as students
