**Aviation Law and Policy in Asia** Jae Woon Lee, 2020-11-23 *Aviation Law and Policy in Asia Smart Regulation in Liberalised Markets* examines the evolution of aviation law and policy in selected Asian jurisdictions and analyses the dynamic regulatory challenges that each jurisdiction faces Prominent aviation law and policy experts in Asia analyse topics such as air transport liberalisation the regulation of air operator certificates legal issues about pilot strikes traffic rights allocation legal challenges arising from new types of aircraft ticket pricing regulation air services agreements airport competitiveness and aircraft financing The case studies and recommendations presented in this book both enrich theoretical debates and serve as a roadmap for understanding aviation law and policy in Asia *Finance in Asia* Qiao Liu, Paul Lejot, Douglas W. Arner, 2013-03-12 Asia's demand for second generation financial institutions and markets needs to be met in order for the region's further development to be sustained This book provides a compelling fact based assessment of current practices and regulations in Asia's financial institutions and markets and carefully documents the exciting opportunities and challenges that lie ahead in the region's financial systems This book differs in design from typical treatments of financial institutions and markets because its focus is on Asia rather than using the US model in terms of market configurations or products as a benchmark and it takes a contemporary and forward looking view of financial markets Examples of practice from Asia are used to illustrate major accepted themes in finance and financial regulation To the extent that Asia's main economies share characteristics that are distinct for example in the relationship between government and the banking sector or in aspects of corporate governance the book will discuss the consequences for market operation and intermediation The book's carefully structured facts and rigorously argued analysis carry important implications both for students in business and law and for professionals new to financial markets in Asia It will change the way that Asian financial markets and institutions is taught in universities as well as provide a valuable resource for professionals working in finance in Asia *Aircraft & Aerospace Asia-Pacific*, 2000 *Asiamoney*, 2010 *Airfinance Annual*, 2009 *Aviation Business Magazine*, 2008-02 *International Financing Review*, 1997 **Aircraft Financing and Leasing in India Challenges & Opportunities** Dipesh Shah, 2019 Aircraft leasing industry is a significant industry in the world today Activities of the leasing firms have increased drastically over the last few decades Indian aviation industry has seen an unprecedented growth in air passenger traffic both international and domestic over the past decade Over the past few years it has been observed that the geography of the operations for aircraft leasing industry have been moving fast from western nations to eastern nations due to presence of a strong and a stable financial market and active involvements of state Today five out of the twelve biggest lessors belong to Asia They have grown in size because of frequent acquisitions collaborations and partnerships China being the most prominent example of such development The synergies from inorganic growth have been pivotal in the drastic growth of aircraft leasing companies in China India is a laggard in this segment of

aviation industry and must soon explore and derive strategies to develop a robust aircraft leasing industry in the country. Having experienced a surge in aircraft demand many Indian airlines are meeting this demand through offshore aircraft lessors and paying them in dollars. An attempt has been made in this paper to identify the challenges in air craft leasing and financing which present good opportunities for India to develop this industry. For that the paper first discusses the global scenario of aircraft leasing industry which is followed by the aircraft leasing industry in India. To draw some lessons from the Chinese experience it then covers in brief the Chinese aircraft leasing industry. This is followed by details covering challenges and opportunities for this sector and suggests the ways to make India a favourable destination for aircraft leasing business.
