

10. If you are given different frequency table, which method will be the most appropriate?

Answer:

1. If the data is given in frequency table, then we will use the following method.

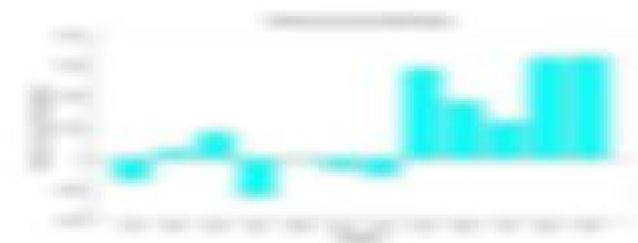

Example: The following table represents the distribution of marks obtained by the 100 students in the 100 marks test. Find the mode.

Answer:

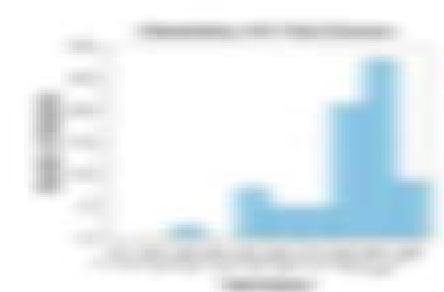

1. In the graph, the class of maximum height is called the height of the bar representing the maximum of data in each category.

Example: The following bar graph shows the number of students who passed in each class in an examination. Find the mode in this data.

Answer:

2. In histogram, the height of each bar represents the frequency of the corresponding class. Therefore, the class having maximum height will have the maximum frequency.

Analysing Quantitative Data Raymond A Kent, 2015-03-16 This innovative book provides a fresh take on quantitative data analysis within the social sciences. It presents variable based and case based approaches side by side encouraging you to learn a range of approaches and to understand which is the most appropriate for your research. Using two multidisciplinary non experimental datasets throughout the book demonstrates that data analysis is really an active dialogue between ideas and evidence. Each dataset is returned to throughout the chapters enabling you to see the role of the researcher in action. It also showcases the difference between each approach and the significance of researchers decisions that must be made as you move through your analysis. The book is divided into four clear sections: Data and their presentation, Variable based analyses, Case based analyses, Comparing and combining approaches. Clear, original and written for students, this book should be compulsory reading for anyone looking to conduct non experimental quantitative data analysis. **EBOOK: Business**

Research Methods Boris Blumberg, Donald Cooper, Pamela Schindler, 2014-03-16 Are you about to begin your dissertation or a research project but don't know what topic to choose? Are you unsure of what research methods to use and how they should be applied to your project? Are you worried about how to write up your research project? Then this is the book for you! A balanced coverage of qualitative and quantitative methods means that no matter what approach you choose to use for your project, there are examples and case studies to help guide you through the process. Student Research boxes provide an insight into situations and research decisions that students have encountered in real life projects. They contain hints, tips and sometimes questions to help you think through your own project. A Running Case Study charts the progression of two student research projects, one qualitative and one quantitative, and shows how the content of each chapter can be used to develop their projects. Thought provoking questions are included in order to help you consider the issues and decisions involved which you can then apply to your own project. Deeper Insight boxes delve further into particular research issues, offering you a detailed description to increase your understanding of these areas, whilst Real Life examples put research methods into context by showing you how they have been applied in real world situations. The Online Learning Centre contains a vast amount of extra resources to help you create a superior project. Six statistical chapters are available to help you prepare, test and analyse your hypotheses and data. Extra cases, appendices and dataset exercises help you to take your study further. Check out the Research Skills Centre for free chapters of Study Skills books, examples of good and bad proposals and templates for questionnaires and surveys.
