

The image shows a factory environment with a strong blue color cast. In the foreground, two white industrial robotic arms are positioned, one on the left and one on the right. They appear to be working on a central point, with a cloud of orange-brown sparks or dust being generated between them. The background is filled with the structural elements of a factory, including beams and pipes, with some blurred figures of workers in the distance. The overall scene conveys a sense of active industrial manufacturing.

**Autonomous Robots** Farbod Fahimi, 2008-10-25 It is at least two decades since the conventional robotic manipulators have become a common manufacturing tool for different industries from automotive to pharmaceutical The proven benefits of utilizing robotic manipulators for manufacturing in different industries motivated scientists and researchers to try to extend the applications of robots to many other areas by inventing several new types of robots other than conventional manipulators The new types of robots can be categorized in two groups redundant and hyper redundant manipulators and mobile ground marine and aerial robots These groups of robots known as advanced robots have more freedom for their mobility which allows them to do tasks that the conventional manipulators cannot do Engineers have taken advantage of the extra mobility of the advanced robots to make them work in constrained environments ranging from limited joint motions for redundant or hyper redundant manipulators to obstacles in the way of mobile ground marine and aerial robots Since these constraints usually depend on the work environment they are variable Engineers have had to invent methods to allow the robots to deal with a variety of constraints automatically A robot that is equipped with those methods is called an Autonomous Robot *Autonomous Robots Kinematics Path Planning and Control* covers the kinematics and dynamic modeling analysis of Autonomous Robots as well as the methods suitable for their control The text is suitable for mechanical
