

BIOCENTRISM

Biocentrism is an ethical worldview that states that all living things carry an inherent value and are therefore to be considered morally (Attfield, 2013).

EXAMPLE

Vegetarianism and Veganism

Animals are not deemed appropriate for human consumption by vegetarians and vegans. People acting according to the biocentric perspective have a commitment to the equal treatment of species in addition to a dedication to prevent unnecessary harm to animals (Sterba, 2011).

Biocentrism:

Biocentrism Robert Lanza, Bob Berman, 2010-05-18 Robert Lanza is one of the most respected scientists in the world a US News it suggests the exhilarating possibility that life is fundamentally immortal The 21st century is predicted to be the Century of Biology a shift from the previous century dominated by physics It seems fitting then to begin the century by turning the universe outside in and unifying the foundations of science with a simple idea discovered by one of the leading life scientists of our age Biocentrism awakens in readers a new sense of possibility and is full of so many shocking new perspectives that the reader will never see reality the same way again

Is Biocentrism Dead? Raj Bogle, 2014-05-16 Is Biocentrism Dead It is a topic that many find a bit off putting but it is a question that many individuals are starting to pose as they become wiser The book explains what biocentrism is and how the tenets that surround this concept came into being This is a book that the inquiring mind will appreciate thus it is ideal for the individuals who want to learn more about themselves and the world around them The author gradually disseminates the information to the reader allowing them to fully understand what biocentrism really means

Understanding Biocentrism: The True Nature of the Universe Revealed Peter Thomas, 2014-07-24 Have You Ever Wondered About The True Nature Of The Universe What Is Beyond The Mysterious Beyond Is There Another Life Somewhere While many explorers are trying to find answers to our questions Dr Robert Lanza comes forward with a revolutionary new view of the universe Understanding Biocentrism will trigger more questions that relate to our traditional ideas of life space and death Biocentrism seem to bridge the gap between the existences of life contradicting the teachings of physics This book penetrates biocentrism and the ideology of Dr Robert Lanza and other professionals before him who in one way or another shares the same ideology as he does This book attempts to answer the following questions

- o What is biocentrism
- o What is the connection of biocentrism and the universe
- o What are the teachings of quantum physics and biocentrism
- o What is the ideology behind intellicentrism and universecentrism
- o How are these ideology compare to biocentrism
- o What are the principles of biocentrism

Beyond Biocentrism Robert Lanza, Bob Berman, 2016-05-03 Biocentrism shocked the world with a radical rethinking of the nature of reality But that was just the beginning In Beyond Biocentrism acclaimed biologist Robert Lanza one of TIME Magazine s 100 Most Influential People in 2014 and leading astronomer Bob Berman take the reader on an intellectual thrill ride as they re examine everything we thought we knew about life death the universe and the nature of reality itself The first step is acknowledging that our existing model of reality is looking increasingly creaky in the face of recent scientific discoveries Science tells us with some precision that the universe is 26.8 percent dark matter 68.3 percent dark energy and only 4.9 percent ordinary matter but must confess that it doesn't really know what dark matter is and knows even less about dark energy Science is increasingly pointing toward an infinite universe but has no ability to explain what that really means Concepts such as time space and even causality are increasingly being demonstrated as meaningless All of science is based on information passing through

our consciousness but science hasn't the foggiest idea what consciousness is and it can't explain the linkage between subatomic states and observation by conscious observers. Science describes life as a random occurrence in a dead universe but has no real understanding of how life began or why the universe appears to be exquisitely designed for the emergence of life. The biocentrism theory isn't a rejection of science. Quite the opposite, Biocentrism challenges us to fully accept the implications of the latest scientific findings in fields ranging from plant biology and cosmology to quantum entanglement and consciousness. By listening to what the science is telling us, it becomes increasingly clear that life and consciousness are fundamental to any true understanding of the universe. This forces a fundamental rethinking of everything we thought we knew about life, death, and our place in the universe.

Ecocritical Reading of James Cameron's "Avatar" Kira Fleckenstein, 2017-11-10. Seminar paper from the year 2017 in the subject Cultural Studies Miscellaneous grade 1-3 Ruhr University of Bochum language English abstract. This paper is meant to depict in which ways popular culture is dealing with ecocritical questions and motifs of anthropocentrism. Avatar by James Cameron has been chosen as an object of investigation since it is a piece of popular culture which has attained a massive popularity at the end of the previous decade. It can therefore be seen as a rather modern representation of our society, keeping in mind that the movie has met a greatly positive resonance within a worldwide audience, occupying the first position in the box office index Top 100 Films of all time worldwide gross and has obtained 73 awards and another 148 nominations. The environmental message behind it can easily be assumed by the average spectator and has also been discussed by Cameron himself during several interviews, but this essay plans on further analyzing the different motifs used in this work which contribute to this perception regarding elements of ecocriticism and representations of anthropocentrism within the story and its realization. The plan is to have a look at articles published by popular magazines dealing with the perception and potential messages behind the movie and to do an ecocritical reading of the movie with these perceptions in mind. On the one hand, the movie has enjoyed an overall positive resonance and high rankings by movie critics. One could argue that the underlying environmental message has raised awareness for the preciousness and vulnerability of the world we live in, which can be seen in the amount of environmental discussions evoked by the film and its plenty reviews dealing with the intended message behind the story. Manola Dargis has argued that with blue people and pink blooms, Cameron has confirmed its cinema's wonder. Other critics such as Michael Graham Richard have called it a Big Movie with Big Environmental themes and noted that it's pretty obvious that the movie has an important green theme. Usually, movies and other literary works conveying big themes do not gain positive resonance only, and that is what the paper is interested in.

Biocentrism and Modernism Oliver Arpad Istvan Botar, Isabel Wünsche, 2011. Examining the intersections between art and scientific approaches to the natural world. Biocentrism and Modernism reveals another side to Modernism's development.

While historians have usually framed this movement as being mechanistic and against nature the essays in this collection illuminate the role that nature centric ideologies played in late nineteenth to mid twentieth century Modernism Looking at philosophy and application this volume features case studies of artists such as Duchamp Villon Klee Kandinsky and Pollock

The Ethics of the Environment Robin Attfield,2008 This book brings together over thirty leading contributions to environmental ethics from pioneering papers to recent work at the cutting edge of thought in this field The introduction links together these articles and also appraises their strengths and weaknesses and presents a distinctive overview of the subject
