## **Color Atlas Of Clinical Neurology:**

*Color Atlas of Clinical Neurology* Malcolm Parsons, 1993-01-01      *A colour atlas of clinical neurology* Malcolm Parsons, 1988      **Atlas of Clinical Neurology** Roger N. Rosenberg, 2009-02-03 The newly revised comprehensive four color Atlas of Clinical Neurology is extensively updated with reference to current literature The new third edition organizes the highest quality images from the field of clinical neurology including clinical syndromes for neurologists and clinicians The atlas highlights the enormous strides being made in the biologic understanding of neurologic disease covering developmental and genetic diseases neuroendocrine disorders critical care neurology cerebrovascular disease dementias behavioral neurology neuro oncology movement disorders epilepsy neuromuscular diseases infectious diseases neuroimmunology neurotoxic disorders and headache This indispensable collection contains over 1300 images including algorithms tables charts and schematic drawings      **Clinical Neuropathology** Catherine Haberland, 2006-12-27 Divided into fourteen chapters this text and full color atlas is a complete overview of the pathologic and clinical aspects of neurologic diseases Clinical Neuropathology is written for practicing neurologists and pathologists as well as residents and fellows preparing for the neurology and pathology boards It provides information on the structural alterations of nervous system diseases along with their clinical manifestations The first two chapters cover the process and goals of the neuropathologic exam and histological reactions particular to the nervous system Subsequent chapters review major disease categories with each section containing an overview of pathologic and clinical characteristics in general a description of the gross and histologic features along with their clinical features and data on pathogenetic mechanisms Filled with tables to clarify major points case histories to provide clinical correlates and Board type chapter review questions with answers and explanations this text will be a valuable addition to all individual and reference libraries Key Benefits Almost 600 full color illustrations Case histories keyed to images provide clinical correlation with pathology Over 90 tables summarizing key points useful for quick reference and exam preparation End of chapter Board type questions with answers and explanations for self assessment and exam preparation      *Color Atlas of Neurology* Reinhard Rohkamm, 2004 Highly Commended at the 2004 British Medical Awards Medical Book Competition Neurology made visible Every practitioner in modern medicine is confronted daily with neurologic symptoms diagnoses and clinical problems Yet there is scarcely any other medical specialty that is so fraught with complexities and abstractions This pocket atlas is designed to provide a better easier to understand visual guide on what the reader needs to know about neurology In a unique way neurology is made visible in the truest sense of the word Coverage includes The basic principles of neuroanatomy and neurophysiology structure of the CNS peripheral nerves stimulus transmission nerve conduction velocity etc Diagnostic methods and procedures clinical examinations electrophysiologic techniques imaging studies etc Neurologic disorders including their clinical manifestations pathogenesis and principles of treatment These topics and more are covered in elaborately drawn meticulously labeled illustrations The effective concept of

placing the illustrations opposite the descriptive text for a particular subject has created word and picture units that combine maximum teaching impact with an optimum density of information. Neurologic relationships can be grasped literally at a glance. This pocket atlas is intended for medical students, physicians, and other medical professionals, nurses, physical therapists, occupational therapists, speech therapists, who could profit from a visual guide to neurology. Mosby's Color Atlas and Text of Neurology George David Perkin, 1998. Offering a unique format of high quality illustrations and clear concise text. COLOR ATLAS AND TEXT OF NEUROLOGY is the perfect reference to improve the non specialist's fundamental understanding of neurological disorders. It provides vital information on the key techniques of the neurological work up, analysis of behavior, interview, examination, presenting physical signs and analysis of investigation results. From cover to cover it assists the reader in making an accurate diagnosis, an often difficult task in this challenging area. Extremely well illustrated with just the right amount of textual information to help the physician perform the neurological work up and arrive at a correct diagnosis. Contains a high proportion of clinical examination information, symptom discussion and corresponding artwork assisting the reader in making informed decisions. Focuses on the most common diseases and disorders those that are typical of what the non neurologist is likely to see in his or her practice. Includes information on clinical and pathological appearances of neurological disorders with a brief description of each, also covers the course, clinical presentation, differential diagnosis, investigations and principles of management for each disorder.
