

## Applications:

10. Compare these four mixes for apple juice.

- Which mix would make the most "appley" juice? Explain your reasoning.
  - Suppose you make a single batch of each mix. What fraction of each batch is concentrate?
  - Rewrite your answers to part (b) as percents.
  - Suppose you make only 1 cup of Mix W. How much water and how much concentrate do you need?
11. Examine these statements about the apple juice mixes in Exercise 10. Decide whether each is accurate. Give reasons for your answers.
- Mix Y has the most water per batch, so it will taste the least "appley."
  - Mix Z is the most "appley" because the difference between the concentrate and water is 2 cups. It is 3 cups for each of the others.
  - Mix Y is the most "appley" because it has only  $1\frac{1}{2}$  cups of water for each cup of concentrate. The others have more water per cup.
  - Mix X and Mix Y taste the same because you just add 3 cups of concentrate and 3 cups of water to turn Mix X into Mix Y.
