

DNB Ophthalmology Solved Question Paper: Dec 2022 Paper 1

Q1. Discuss in detail the interventional modalities to halt progression of keratoconus. Discuss in detail the various refractive surgeries which can be done to provide visual rehabilitation in non- progressive keratoconus. [5+5]

Answer

The interventional modalities to halt progression of keratoconus are:

* Collagen cross linking (CXL, C3R)-

- Corneal collagen cross-linking (CXL) was first introduced by Wollensak et al. as a promising technique to slow or stop the progression of keratoconus.
- In CXL, riboflavin (vitamin B2) is administered in conjunction with ultraviolet A (UVA, 365 nm) which leads to the formation of reactive oxygen species, which ultimately leads to the formation of additional covalent bonds between collagen molecules, with consequent biomechanical stiffening of the cornea .
- CXL is followed using a standardized protocol (standard Dresden protocol), which involves epithelial removal, followed by dextran-based 0.1% riboflavin solution applied to the cornea for 20 min.
- The cornea is then exposed to a ultraviolet-A (UV-A) lamp, under an illumination intensity of 3 mW/cm² for 30 min, with a radiant exposure of 5.4 J/cm²

* Accelerated Cross-linking-

- Accelerated protocols have evolved in an attempt to overcome the limitations of conventional cross-linking (increased intraoperative time is a major drawback with standard Dresden protocol), while maintaining the efficacy of results.

Aravind FAQs in Ophthalmology Venkatesh N Prajna, 2023-07-31 This book is a compilation of frequently asked questions FAQs with answers to help students prepare for postgraduate ophthalmology examinations The third edition comprising more than 1200 pages has been fully revised to provide students with the latest information and advances in the field Answers to questions have been meticulously refined in line with current concepts and knowledge Divided into fourteen sections the book begins with an introduction followed by numerous questions for each part of the eye As well as exam oriented questions the text also features a management summary of commonly kept examination cases and examples of case sheet writing The final section provides an ophthalmology question bank to assist students with revision and test their understanding The previous edition 9789386261090 published in 2018 Ophthalmology Nicholas R. Galloway, Stephen A. Vernon, 2012-12-06 This series of multiple choice questions is based on the textbook *Common Eye Diseases And Their Management* 1985 also from Springer Verlag The questions have been grouped to fit in with the chapter headings in the latter Many of the questions are supported by expanded answers but further information should be sought in the textbook The format of the questions has been arranged so that the number of true or false answers varies and we have taken pains to eliminate the ambiguities which tend to creep into multiple choice question papers In compiling these questions we have attempted to incorporate a number of key facts and it will be seen that these have occasionally been repeated for emphasis A surprisingly large amount of information is contained in questions and answers and simply reading through both can be a useful learning experience in itself The questions have been aimed at the medical student level but it is hoped that they may be of some value to general practitioners outside ophthalmology and perhaps also to postgraduates The computerised Kuder Richardson reliability index which measures the consistency of a student's performance has shown these questions to be reliable in assessing a student's knowledge A sample of these questions has been tested in another medical school and we understand that students' marks there equate well with the results from essay questions **Update in General Medicine**
