Accelerate Luke Deering, Matt Cartagena, Chris Dowdeswell, 2013-12-14 Ever wondered what entrepreneurs learn from participating in the world's leading startup accelerator programs Accelerate is a great survey of a wide range of entrepreneurs that will give anyone interested in participating in an accelerator a deep understanding of what goes on Brad Feld Managing Director Foundry Group and Co founder of Techstars Key takeaways from Accelerate Do Stuff If you haven't acted at least twice as much as you've talked then there is something wrong User Acquisition it starts here and it ends here almost everything else depends on it Focus Know what's a waste of time and what's important In other words separate the ice cream from the horseshit the ice cream does nothing for the horseshit but the horseshit ruins the taste of the ice cream Accelerators In 1959 there was one accelerator incubator Batavia Industrial Center in New York in 2005 there was one accelerator Y Combinator which graduated a class of eight startups that included Reddit Now in 2013 there are hundreds of accelerators each offering a unique set of values The story this trend tells us is that accelerator programs are growing in popularity just as startups are Teams Accelerators pick teams not individuals not necessarily ideas and not your pitch Your team is the linchpin of it all it ties all the other good stuff together Accelerator Startup Fit You need to figure out what's most important to your company who you need to know what you need to know and which accelerator can get you that Know the type of founders industry experts and influencers you need to know If the network or community that you need to bring your product to market isn't there then it isn't there and maybe you shouldn't be either Fundraising is of course a factor but it shouldn't be of the highest priority The money you'll get out of an accelerator experience is one form of currency but the various other forms such as mentorship exposure and introductions have far greater multiplier effects than the linear nature of money
