After reading the Fast Fashion Fact File, answer the following questions.

1. In your own words, describe what is meant by the term 'fast fashion'.  
**Fast fashion refers to the cheap, disposable and trendy clothing items that are mass-produced by retailers.**
2. Identify three factors pre-1950s that limited the number of clothing items that people would buy and own.
  1. **Clothing designers only released four collections per year: spring, summer, autumn and winter.**
  2. **The process of creating these items by the designer was much more labour-intensive and included designing the clothing and fabric, engineering the patterns and making the clothing to order based on the customer's measurements.**
  3. **The cost of clothing was out of the price range of many people, consequently only the wealthy could afford many items of clothing.**
3. Explain how the release of the paper clothing by the Scott Paper Company gave rise to the fast fashion industry.  
**After the success of the paper clothing released by the Scott Paper Company, retailers realised that consumers were ready for cheap and trendy clothing designs. Fashion designers were inspired to create cheap and easy clothing that was not designed to last for years, but rather disposed of once it was damaged or the fashion trends changed.**
4. The Fact File states that 'new technologies and rapid globalisation meant that it was cheaper to design and manufacture clothes.'  
infer or investigate the 'new technologies' that made it possible to design and manufacture cheaper clothing.  
**Fast fashion was made possible due to industrial sewing machines that make manufacturing possible. Additionally, computer technologies that allow for quicker and easier designing processes and programmable hardware. Lastly, the rise in plastic and synthetic materials changed the textile industry.**
