

# *Introduction to Philosophy*

Philosophy 103

**Dr. Stephen Hicks**

Scarborough 119 Phone: 815 226 4078

SHicks@Rockford.edu Website: www.StephenHicks.org

Philosophy asks the big questions of life: What is it to be a fully developed human being? Am I in control of my destiny? What kind of world are we living in—for example, do the gods or a God exist? How do we know these things—should we believe based on tradition, feelings, faith, evidence? And what difference does it make—what is the best kind of life to live? We will grapple with fundamental philosophical issues and discuss the views of major thinkers in the Western intellectual tradition.

## **Readings**

René Descartes, *Meditations on First Philosophy* (Hackett)  
Sigmund Freud, *Civilization and Its Discontents* (W. W. Norton)

Rendall, John Middleton Murry**

Inference Relies on the core concept of Bayesian inferential statistics to help practicing forensic scientists in the logical and balanced evaluation of the weight of evidence Decision Making Features how Bayes factors are interpreted in practical applications to help address questions of decision analysis involving the use of forensic science in the law Operational Relevance Combines inference and decision backed up with practical examples and complete sample code in R including sensitivity analyses and discussion on how to interpret results in context Over the past decades probabilistic methods have established a firm position as a reference approach for the management of uncertainty in virtually all areas of science including forensic science with Bayes theorem providing the fundamental logical tenet for assessing how new information scientific evidence ought to be weighed Central to this approach is the Bayes factor which clarifies the evidential meaning of new information by providing a measure of the change in the odds in favor of a proposition of interest when going from the prior to the posterior distribution Bayes factors should guide the scientist s thinking about the value of scientific evidence and form the basis of logical and balanced reporting practices thus representing essential foundations for rational decision making under uncertainty This book would be relevant to students practitioners and applied statisticians interested in inference and decision analyses in the critical field of forensic science It could be used to support practical courses on Bayesian statistics and decision theory at both undergraduate and graduate levels and will be of equal interest to forensic scientists and practitioners of Bayesian statistics for driving their evaluations and the use of R for their purposes This book is Open Access
