

Supply Chain & Logistics Management Questions & Answers:

1. What are the functions of supply chain management?

Supply chain management (SCM) is the coordination and management of all activities involved in the production and delivery of goods and services to customers. The functions of supply chain management include:

1. **Planning and forecasting:** This involves predicting customer demand for a product and planning the supply chain accordingly. It also involves identifying the resources required to produce and deliver the product.
2. **Sourcing:** This function involves identifying and selecting suppliers who can provide the required resources, materials, and services for the production process.
3. **Production:** This function involves managing the actual production process, including the procurement of raw materials, manufacturing, and quality control.
4. **Inventory management:** This involves managing the level of inventory in the supply chain, ensuring that the right amount of inventory is available at the right time to meet customer demand.
5. **Logistics and distribution:** This function involves managing the transportation and delivery of goods to customers, ensuring that products are delivered on time and in good condition.

Overall, supply chain management aims to improve the efficiency and effectiveness of the supply chain, reduce costs, and improve customer satisfaction.

2. Concept / Components and functions of Physical Distribution.

Physical distribution refers to the process of delivering products from the manufacturer or supplier to the end consumer. It involves several components and functions that work together to ensure timely and efficient delivery of goods.

The components of physical distribution include:

1. **Transportation:** This involves selecting the appropriate mode of transportation, such as trucks, trains, ships, or planes, to move the products from the manufacturer to the end consumer.
2. **Warehousing:** This component involves the storage of products in a warehouse until they are ready to be shipped to the end consumer. This includes inventory management, order picking, and packing.
3. **Order processing:** This function involves the coordination of orders between the manufacturer, distributor, and end consumer. It includes order placement, order processing, and order tracking.
4. **Packaging:** This component involves the proper packaging of products to ensure they are protected during transportation and delivery.
5. **Material handling:** This function involves the movement of products within a warehouse or distribution center, including loading and unloading of products.

The functions of physical distribution include:

1. **Customer service:** This function involves meeting customer expectations by delivering products on time, in the right quantity and quality, and with proper packaging.
