## **Ns2 Vanet Simulation Example Codes:**

**Microservices in Big Data Analytics** Anil Chaudhary, Chothmal Choudhary, Mukesh Kumar Gupta, Chhagan Lal, Tapas Badal, 2019-11-26 These proceedings gather cutting edge papers exploring the principles techniques and applications of Microservices in Big Data Analytics The ICETCE 2019 is the latest installment in a successful series of annual conferences that began in 2011 Every year since it has significantly contributed to the research community in the form of numerous high quality research papers This year the conference s focus was on the highly relevant area of Microservices in Big Data Analytics

**Web, Artificial Intelligence and Network Applications** Leonard Barolli, Flora Amato, Francesco Moscato, Tomoya Enokido, Makoto Takizawa, 2020-03-30 This proceedings book presents the latest research findings and theoretical and practical perspectives on innovative methods and development techniques related to the emerging areas of Web computing intelligent systems and Internet computing The Web has become an important source of information and techniques and methodologies that extract quality information are of paramount importance for many Web and Internet applications Data mining and knowledge discovery play a key role in many of today s major Web applications such as e commerce and computer security Moreover Web services provide a new platform for enabling service oriented systems The emergence of large scale distributed computing paradigms such as cloud computing and mobile computing systems has opened many opportunities for collaboration services which are at the core of any information system Artificial intelligence AI is an area of computer science that builds intelligent systems and algorithms that work and react like humans AI techniques and computational intelligence are powerful tools for learning adaptation reasoning and planning and they have the potential to become enabling technologies for future intelligent networks Research in the field of intelligent systems robotics neuroscience artificial intelligence and cognitive sciences is vital for the future development and innovation of Web and Internet applications Chapter An Event Driven Multi Agent System for Scalable Traffic Optimization is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](http://springer.com)

*Emerging Trends in Computer Science and Its Application* Anurag Tiwari, Manuj Darbari, 2025-04-08 The conference brought together a diverse group of scholars researchers and industry professionals to engage in meaningful discussions and share insights on cutting edge trends in artificial intelligence machine learning data science and their multifaceted applications This collaboration and knowledge exchange fostered an environment of innovation making the conference a successful and impactful event for all participants It aimed to highlight these significant advancements and serve as a valuable resource for researchers academicians and practitioners who wish to stay informed about the recent innovations and methodologies shaping the landscape of computational intelligence By showcasing a wide range of research topics and practical implementations it not only addressed the current challenges but also inspired new ideas and approaches for future research

*Complex, Intelligent, and Software Intensive Systems* Leonard Barolli, Nadeem Javaid, Makoto Ikeda, Makoto Takizawa, 2018-06-18 This

book provides a platform of scientific interaction between the three challenging and closely linked areas of ICT enabled application research and development software intensive systems complex systems and intelligent systems Software intensive systems strongly interact with other systems sensors actuators devices other software systems and users More and more domains are using software intensive systems e g automotive and telecommunication systems embedded systems in general industrial automation systems and business applications Moreover web services offer a new platform for enabling software intensive systems Complex systems research is focused on the overall understanding of systems rather than their components Complex systems are characterized by the changing environments in which they interact They evolve and adapt through internal and external dynamic interactions The development of intelligent systems and agents which are increasingly characterized by their use of ontologies and their logical foundations offer impulses for both software intensive systems and complex systems Recent research in the field of intelligent systems robotics neuroscience artificial intelligence and cognitive sciences are vital for the future development and innovation of software intensive and complex systems Applied Physics, System Science and Computers Klimis Ntalianis, Anca Croitoru, 2017-07-20 This book reports on advanced theories and methods in three related fields of research applied physics system science and computers It is organized in two main parts the first of which covers applied physics topics including lasers and accelerators condensed matter soft matter and materials science nanoscience and quantum engineering atomic molecular optical and plasma physics as well as nuclear and high energy particle physics It also addresses astrophysics gravitation earth and environmental science as well as medical and biological physics The second part focuses on advances in system science and computers exploring automatic circuit control power systems computer communication fluid mechanics simulation and modeling software engineering data structures and applications of artificial intelligence among other areas Offering a collection of contributions presented at the 1st International Conference on Applied Physics System Science and Computers APSAC 2016 the book bridges the gap between applied physics and electrical engineering It not only to presents new methods but also promotes collaborations between different communities working on related topics at the interface between physics and engineering with a special focus on communication data modeling and visualization quantum information applied mechanics as well as bio and geophysics

Mobile Computing and Communications Review ,2008 Intelligent Networks Vivek Kumar Singh, Anil Kumar Sagar, Parma Nand, Rani Astya, Omprakash Kaiwartya, 2024-12-12 The book presents the latest developments in intelligent communication networks based on applicability from various domains of artificial intelligence and machine learning including channel modeling model based structure channel prediction and signal detection It further explains important topics such as vehicular mobility modeling human centric network applications security and privacy in social networks and trust based intelligent transportation systems This book Presents a model based approach to constructing an effective network by using state of the art artificial intelligent techniques Discusses the theoretical and practical applications of channel prediction and

signal detection Introduces the fundamental concepts and application of vehicular networks in conjunction with artificial intelligence Explores wireless communication network techniques enabled by human centric applications designed and developed with artificial intelligence characteristics Highlights the challenges in designing and developing an effective and intelligent communication network that can be applied in different domains of human activities for finding sustainable solutions It is primarily written for senior undergraduate graduate students and academic researchers in the fields of electrical engineering electronics and communications engineering computer engineering and information technology

**Next-Gen Technologies in Computational Intelligence** R. Anandan, M. Senthil Kumar, Biji C. L., Vicente García Díaz, Souvik Pal, 2024-06-07 The Proceeding includes the research contribution from the International Conference on Next Gen Technologies in Computational Intelligence NGTCA 2023 held on March 24th 2023 at Vels Institute of Science Technology and Advanced Studies NGCTA 2023 is the flagship conference of the Computer Society of India Region 7 Computer Society of India CSI is the largest association of IT professionals in India CSI is a non profit organization established in 1965 and its members are committed to the advancement of theory and practice of Computer Engineering and Technology Systems The Mission of CSI is to facilitate research knowledge sharing learning and career enhancement for all categories of IT professionals while simultaneously inspiring and nurturing new entrants into the industry and helping them to integrate into the IT community At present CSI has 76 chapters across India over 550 student branches with 1 00 000 plus members It serves its members through technical events seminars workshops conferences publications journals research projects competitions special interest groups awards recognitions etc Various CSI chapters conduct Research Convention every year

Wireless Sensor Multimedia Networks Mohamed Mostafa A. Azim, Xiaohong Jiang, 2015-10-28 Wireless sensor networks WSNs are a special class of ad hoc network in which network nodes composed of tiny sensors pass data such as temperature pressure and humidity through the network to a central location Wireless sensor multimedia networks WSMNs are a special category of WSNs in which the sensor nodes are small cameras and microphones
