Dropshipping is different from the conventional retail model in that in dropshipping the seller does not own an inventory. He or she purchases an order from a third party. The dropshipping model like everything else has drawbacks and benefits. You need less capital; this is arguably the biggest advantage. You do not need thousands of dollars to start an e-commerce store. Conventional retailers need to have a huge amount of capital to build their inventory. In dropshipping, you only purchase a product once a customer has placed an order and made the payment. An initial inventory investment is not needed. Easy to start an e-commerce business becomes much easier to run when you do not handle physical products. You will not worry about a warehouse, packing and shipping, tracking, inventory handling, returns, and much more. Low overhead since you will not be dealing with a warehouse or purchasing inventory; expect low overhead expenses. A lot of people run a dropshipping business from their home office with their laptop and only use about 100 per month. The expenses may increase as your business grows, but they will still be low. Flexible location: if you have an internet connection, you can manage your dropshipping business from anywhere.

Dropshipping is an online business that involves connecting a potential buyer of a product with a seller or supplier. What happens is that you as the dropshipper are only but a middleman between a supplier and buyer of a product. Now is the time to research your product and niche and get it out there to build customers, passive income and independence. Dropshipping is a win for the customer or buyer because the products they buy through this means help them to solve their problems. When many people have issues or when they need products they often do not know where or how to get the products. If a dropshipper helps such a buyer to find the products they need then the buyer has benefited from dropshipping as a business model. Low capital requirements is probably the biggest advantage of dropshipping since one does not need to purchase any inventory they can launch an ecommerce store with minimal capital. Here are some topics covered in this book: The advantages of dropshipping, How to start up, Market research and selection of a product, Dropshipping order fulfillment, Dealing with product returns and customer service, How to advertise online, Facebook ads, How to compete with other drop shipping companies, Common mistakes, Tips for delivering a seamless customer experience, Automating your store, What's in a winning product, Amazon FBA AND MORE.
