Co-simulations of Microwave Circuits and High-Frequency Electromagnetic Fields Mei Song Tong, Xiao Yu Li, 2024-07-03
This book aims to provide many advanced application topics for microwave circuits and high frequency electromagnetic EM fields by using advanced design system ADS and high frequency structure simulator HFSS as simulation platforms In particular it contains the latest multidisciplinary co simulation guidance on the design of relevant components and devices Currently the circuit field design and performance analysis and optimization strongly rely on various kinds of robust electronic design automation EDA software RF microwave engineers must grasp two or more types of related simulation design software ADS by Keysight and HFSS by Ansys are the representative for circuit simulations and for field and structural simulations of microwave devices respectively At present these two types of software are widely used in enterprises universities and research institutions The main purpose of this book is to enable readers who are interested in microwave engineering and applied electromagnetics to master the applications of these two tools It also helps readers expand their knowledge boundaries behind those types of software and deepen their understanding of developing interdisciplinary technologies by co simulations The book is divided into three parts The first part introduces the two latest versions of ADS and HFSS and helps readers better understand the basic principles and latest functions better It also advises how to choose appropriate simulation tools for different problems The second part mainly describes co simulations for high frequency EM fields microwave circuits antenna designs EM compatibility EMC and thermal and structural analyses It provides guides and advices on performing co simulations by ADS and HFSS incorporated with other types of software respectively The last part narrates the automation interfaces and script programming methods for co simulations It primarily deals with the Advanced Extension Language AEL Python Data Link PDL and MATLAB interface in ADS For HFSS it discusses VBScript IronPython scripting and Application Programming Interface APIs based on MATLAB Each topic contains practical examples to help readers understand so that they can gain a solid knowledge and skills regarding automated interfaces and scripting methods based on these kinds of software Concisely written in combination with practical examples this book is very suitable as a textbook in introductory courses on microwave circuit and EM simulations and also as a supplementary textbook in many courses on electronics microwave engineering communication engineering and related fields As well it can serve as a reference book for microwave engineers and researchers

Nonlinear Modeling Analysis and Predistortion Algorithm Research of Radio Frequency Power Amplifiers Jingchang Nan, Mingming Gao, 2021-07-29 This book is a summary of a series of achievements made by the authors and colleagues in the areas of radio frequency power amplifier modeling including neural Volterra series modeling neural network modeling X parameter modeling nonlinear analysis methods and power amplifier predistortion technology over the past 10 years The book is organized into ten chapters which respectively describe an overview of research of power amplifier behavioral models and predistortion technology nonlinear

characteristics of power amplifiers power amplifier behavioral models and the basis of nonlinear analysis an overview of power amplifier predistortion Volterra series modeling of power amplifiers power amplifier modeling based on neural networks power amplifier modeling with X parameters the modeling of other power amplifiers nonlinear circuit analysis methods and predistortion algorithms and applications Blending theory with analysis this book will provide researchers and RF microwave engineering students with a valuable resource

A Practical Guide to The Wiring Regulations Geoffrey Stokes,John Bradley,2009-04-15 This best selling text has been revised to reflect the requirements of the 17th Edition of the IEE Wiring Regulations BS 7671 2008 It includes essential information on the new rules applied to special installations or locations such as bathrooms swimming pool locations camping caravan sites marinas exhibition and show locations solar photovoltaic power supply systems and floor and ceiling heating systems amongst others It presents clear explanations on inspection testing certification and reporting test instruments and test methods as well as covering electricity the law standards and codes of practice assessment of general characteristics protection against electric shock thermal effects overcurrent undervoltage and overvoltage isolation and switching the common rules of equipment selection switchgear protective devices and other equipment wiring systems including the external influences on them and cable installation methods protective conductors earthing and protective bonding supplies for safety services the smaller installation and specialised installations such as outdoor lighting installations in churches multi occupancy blocks of flats These topics are addressed with pertinent regulation numbers and a useful appendix lists the relevant Standards Background guidance and worked examples are provided where appropriate Like the earlier editions of this text this new edition will be a useful aid for designers installers and verifiers of electrical installations students of the industry wishing to gain better understanding of the many facets of electrical safety and duty holders as defined by the Electricity at Work Regulations 1989
