Fuzzy Image Processing and Applications with MATLAB Tamalika Chaira,Ajoy Kumar Ray,2017-12-19 In contrast to classical image analysis methods that employ crisp mathematics fuzzy set techniques provide an elegant foundation and a set of rich methodologies for diverse image processing tasks However a solid understanding of fuzzy processing requires a firm grasp of essential principles and background knowledge Fuzzy Image Processing and Applications with MATLAB presents the integral science and essential mathematics behind this exciting and dynamic branch of image processing which is becoming increasingly important to applications in areas such as remote sensing medical imaging and video surveillance to name a few Many texts cover the use of crisp sets but this book stands apart by exploring the explosion of interest and significant growth in fuzzy set image processing The distinguished authors clearly lay out theoretical concepts and applications of fuzzy set theory and their impact on areas such as enhancement segmentation filtering edge detection content based image retrieval pattern recognition and clustering They describe all components of fuzzy detailing preprocessing threshold detection and match based segmentation Minimize Processing Errors Using Dynamic Fuzzy Set Theory This book serves as a primer on MATLAB and demonstrates how to implement it in fuzzy image processing methods It illustrates how the code can be used to improve calculations that help prevent or deal with imprecision whether it is in the grey level of the image geometry of an object definition of an object s edges or boundaries or in knowledge representation object recognition or image interpretation The text addresses these considerations by applying fuzzy set theory to image thresholding segmentation edge detection enhancement clustering color retrieval clustering in pattern recognition and other image processing operations Highlighting key ideas the authors present the experimental results of their own new fuzzy approaches and those suggested by different authors offering data and insights that will be useful to teachers scientists and engineers among others *Fuzzy Image Processing and Applications with MATLAB* Tamalika Chaira,2010 In contrast to classical image analysis methods that employ crisp mathematics fuzzy set techniques provide an elegant foundation and a set of rich methodologies for diverse image processing tasks However a solid understanding of fuzzy processing requires a firm grasp of essential principles and background knowledge Fuzzy Image Processing and Applications with MATLAB presents the integral science and essential mathematics behind this exciting and dynamic branch of image processing which is becoming increasingly important to applications in areas such as remote sensing medical imaging Progresses in Artificial Intelligence and Neural Systems Anna Esposito,Marcos Faundez-Zanuy,Francesco Carlo Morabito,Eros Pasero,2020-07-09 This book provides an overview of the current advances in artificial intelligence and neural nets Artificial intelligence AI methods have shown great capabilities in modelling prediction and recognition tasks supporting human machine interaction At the same time the issue of emotion has gained increasing attention due to its relevance in achieving human like interaction with machines The real challenge is taking advantage of the emotional characterization of humans interactions to make computers interfacing with them

emotionally and socially credible The book assesses how and to what extent current sophisticated computational intelligence tools might support the multidisciplinary research on the characterization of appropriate system reactions to human emotions and expressions in interactive scenarios Discussing the latest recent research trends innovative approaches and future challenges in AI from interdisciplinary perspectives it is a valuable resource for researchers and practitioners in academia and industry

Neutrosophy Revisited: Formalizing Core Concepts from Nidus idearum (Book Series) and Related Research Takaaki Fujita, Florentin Smarandache, Uncertainty permeates most real world contexts motivating the need for mathematical frameworks that can faithfully represent vagueness inconsistency and incomplete information Classical approaches to managing these issues include fuzzy sets and intuitionistic fuzzy sets Extending these ideas the neutrosophic framework introduces neutrosophic sets in which each element x is characterized by a triplet of independent degrees representing respectively truth indeterminacy and falsity This book concentrates on a selection of concepts developed and discussed in the Nidus idearum series with particular emphasis on Neutrosophy Plithogenic Sets Physics and related scientific domains The focus is on ideas that despite their conceptual richness and potential applicability have so far received relatively limited systematic treatment The aim is to present these notions in a coherent and accessible manner supporting further theoretical development and encouraging new applications in Neutrosophy Plithogenic Set theory Physics and allied fields
