Economic Development E. Wayne Nafziger, 2012-03-26 Nafziger explains the reasons for the recent fast growth of India Poland Brazil China and other Pacific Rim countries and the slow yet essential growth for a turnaround of sub Saharan Africa The book is suitable for those with a background in economics principles The fifth edition of the text written by a scholar of developing countries is replete with real world examples and up to date information Nafziger discusses poverty income inequality hunger unemployment the environment and carbon dioxide emissions and the widening gap between rich including middle income and poor countries Other new components include the rise and fall of models based on Russia Japan China Taiwan Korea and North America randomized experiments to assess aid an exploration of whether information technology and mobile phones can provide poor countries with a shortcut to prosperity and a discussion of how worldwide financial crises debt and trade and capital markets affect developing countries

The Poverty of Nations Barry Asmus, Wayne Grudem, 2013 We can win the fight against global poverty Combining penetrating economic analysis with insightful theological reflection this book sketches a comprehensive plan for increasing wealth and protecting stability at a national level

Matchmakers David S. Evans, Richard Schmalensee, 2016-05-03 A different kind of matchmaker Many of the most dynamic public companies from Alibaba to Facebook to Visa and the most valuable start ups such as Airbnb and Uber are matchmakers that connect one group of customers with another group of customers Economists call matchmakers multisided platforms because they provide physical or virtual platforms for multiple groups to get together Dating sites connect people with potential matches for example and ride sharing apps do the same for drivers and riders Although matchmakers have been around for millennia they re becoming more and more popular and profitable due to dramatic advances in technology and a lot of companies that have managed to crack the code of this business model have become today s power brokers Don t let the flashy successes fool you though Starting a matchmaker is one of the toughest business challenges and almost everyone who tries to build one fails In Matchmakers David Evans and Richard Schmalensee two economists who were among the first to analyze multisided platforms and discover their principles and who ve consulted for some of the most successful platform businesses in the world explain how matchmakers work best in practice why they do what they do and how entrepreneurs can improve their chances for success Whether you re an entrepreneur an investor a consumer or an executive your future will involve more and more multisided platforms and Matchmakers rich with stories from platform winners and losers is the one book you ll need in order to navigate this appealing but confusing world

Crushing Capitalism Norbert J. Michel, 2025-04-22 Have you heard this narrative The middle class has been hollowed out because of an overreliance on free markets Americans can t compete with low cost labor and imports so all the good jobs in America have disappeared especially those in manufacturing It s a dismal argument that many politicians even some on the right have

spent the past few years spinning. They say that the American dream is dying and that only wealthy Americans have been successful for the past few decades. Supposedly free trade, immigration, and unabated technology have resulted in an economy that no longer works for Americans. The problem with this bleak story is that it is completely wrong. They're misreading both the current level of prosperity in America and how it was created. Americans have been growing richer since the end of the 19th century and now enjoy levels of abundance and opportunity unimaginable 150 years ago. More recently, American incomes have not stagnated; lower income Americans have done much better, and the middle class has grown robustly. The American economy is not perfect, but moving further away from free markets and implementing industrial policy as these politicians want to do will make Americans worse off. More government intervention and restrictions on economic freedoms will kill the American Dream, not save it.

In *Crushing Capitalism*, Norbert J. Michel makes the case for maintaining perspective on how well Americans have done during the past few decades and nurturing the institutions that have enabled Americans to succeed.

[The Case for a Carbon Tax](#) Shi-Ling Hsu, 2012-06-22. There's a simple, straightforward way to cut carbon emissions and prevent the most disastrous effects of climate change, and we're rejecting it because of irrational political fears. That's the central argument of *The Case for a Carbon Tax*, a clear-eyed, sophisticated analysis of climate change policy. Shi-Ling Hsu examines the four major approaches to curbing CO2: cap and trade, command and control, regulation, government subsidies of alternative energy, and carbon taxes. Weighing the economic, social, administrative, and political merits of each, he demonstrates why a tax is currently the most effective policy. Hsu does not claim that a tax is the perfect or only solution, but that unlike the alternatives, it can be implemented immediately and paired effectively with other approaches. In fact, the only real barrier is psychological. While politicians can present subsidies and cap and trade as win-win solutions, the costs of a tax are immediately apparent. Hsu deftly explores the social and political factors that prevent us from embracing this commonsense approach. And he shows why we must get past our hang-ups if we are to avert a global crisis.

The Property Species Bart J. Wilson, 2020. What is property, and why does our species have it? In *The Property Species*, Bart J. Wilson explores how humans acquire, perceive, and know the custom of property and why this might be relevant to understanding how property works in the twenty-first century. Arguing that neither the sciences nor the humanities synthesizes a full account of property, the book offers a cross-disciplinary compromise that is sure to be controversial. Property is a universal and uniquely human custom. Integrating cognitive linguistics with philosophy of property and a fresh look at property disputes in the common law, the book makes the case that symbolic thinking allows humans to locate the meaning of property within a thing. That is, all human beings, and only human beings.

have property in things and at its core property rests on custom not rights Such an alternative to conventional thinking contends that the origins of property lie not in food mates territory or land but in the very human act of creating with symbolic thought something new that did not previously exist Written by an economist who marvels at the natural history of humankind the book is essential reading for experts and any reader who has wondered why people claim things as Mine and what that means for our humanity

The Routledge Handbook of the Philosophy of Economics Conrad Heilmann, Julian Reiss, 2021-11-29 The most fundamental questions of economics are often philosophical in nature and philosophers have since the very beginning of Western philosophy asked many questions that current observers would identify as economic The Routledge Handbook of Philosophy of Economics is an outstanding reference source for the key topics problems and debates at the intersection of philosophical and economic inquiry It captures this field of countless exciting interconnections affinities and opportunities for cross fertilization Comprising 35 chapters by a diverse team of contributors from all over the globe the Handbook is divided into eight sections I Rationality II Cooperation and Interaction III Methodology IV Values V Causality and Explanation VI Experimentation and Simulation VII Evidence VIII Policy The volume is essential reading for students and researchers in economics and philosophy who are interested in exploring the interconnections between the two disciplines It is also a valuable resource for those in related fields like political science sociology and the humanities
