world of Chemistry My desire to create a general chemistry textbook grew out of my concern for the interests of students and
faculty alike Having taught general chemistry for many years and having helped new teachers and future faculty develop the
skills necessary to teach general chemistry I believe I have developed a distinct perspective on the common problems and
misunderstandings that students encounter while learning the fundamental concepts of chemistry and that professors
encounter while teaching them I believe that it is possible for a textbook to address many of these issues while conveying the
wonder and possibilities that chemistry offers With this in mind I have tried to write a text that balances the necessary
fundamental concepts with engaging real life examples and applications while utilizing a consistent step by step problem
solving approach and an innovative art and media program Provided by publisher **Books and Periodicals Online** ,2001
