Business Decision Model Report James Muthanga,2023-05-08 Essay from the year 2023 in the subject Business economics Economic Policy grade A Pwani University language English abstract Climate change is a concept used to refer to a wide range of and long term effects of weather patterns Climate change is a global problem usually caused by the excessive release of carbon dioxide into the atmosphere The burning of wood and fossil fuels has conspicuously impacted the carbon cycle negatively causing a substantial increase in carbon dioxide level The carbon dioxide level has continued to rise in response to the increased conversion of organic forms during the Industrial Revolution Ideally carbon dioxide has increased sharply from 280 ppm to over 400 for the past two centuries Initially people brushed off the idea that such an increase in carbon dioxide was due to human activities The issue of climate change was therefore attributed to nature and treated as a natural component The global community has already acknowledged the implications of climate change and has been striving to reduce carbon emissions for the past few decades Through the United Nations Framework Convention on Climate Change UNFCCC and the Kyoto Protocol a target to limit the mean global temperature rise to no more than or as close to 2 C by the year 2100 was established The objective of this business decision model report is to determine a plausible set of human behavioral and policy changes that would be used to limit the mean global

temperature rise to no more than or as close to 2 C by the year 2100 in alignment with the UNFCCC and the Kyoto Protocol directives

Corporate Regulation for Climate Change Mitigation in Africa Kikelomo O. Kila, 2022-09-08 This book critically analyses the prospects of overhauling the legal framework of climate change regulation of corporations in African state It adopts the dilute interventionism regulatory framework to tackle the culture of regulatory resistance by corporations in Africa Over the course of this volume Kikelomo O Kila critiques the climate change legal framework in all 53 African states and conducts an in depth case study of the two largest economies in Africa Nigeria and South Africa to highlight the commonality of the problems in Africa and the potential for the dilute interventionism paradigm to significantly address these problems The book establishes why African states should directly intervene through legislative mechanisms to compel corporations to incorporate climate change mitigation in their business activities It proposes that this direct intervention should comprise a blend of prescriptive and facilitative mechanisms structured in a dilute interventionism regulatory model Overall this volume argues that implementing this model requires the institution of a strong and independent regulator with a veto firewall protection system that guarantees its de facto independence from government and external influences

Corporate Regulation for Climate Change Mitigation in Africa will be of great interest to climate change stakeholders at the international regional and domestic levels policymakers regulatory practitioners and legal experts on corporate regulation It will also be an insightful resource for students and scholars of climate change and environmental law policy and governance
