

What Factors Affect the Climate of an Imaginary Continent?

Continent X

Climate involves an *average* of weather conditions for a large geographical region over a long period of time. It is described by averages, ranges, and daily and seasonal variations for factors such as rainfall, winds, and temperature. The great number of possible combinations of factors for different parts of the world makes the classification of climates very complicated.

Climate can be described in terms of average temperature (*hot*, *temperate*, or *cold*—from hottest to
