Cybersecurity Risk Management Cynthia Brumfield,Brian Haugli,2021-12 The National Institute of Standards and Technology NIST located in Gaithersburg MD is a U S Department of Commerce division It is assigned the job of promoting innovation and industrial competitiveness It is a research organization filled with some of the world s leading scientists and has produced many Nobel prize winners NIST has a wide ranging mandate develop federal patents oversee over 1 300 Standard Reference Materials run a scientific laboratory in Boulder CO and pursue innovation in encryption technologies among other significant efforts NIST is primarily a scientific and engineering organization and as such produces patents technical breakthroughs documentation and recommendations through extensive consultation with experts in various areas This scientific consensus approach often has impressive results that can be difficult for non specialists to understand or apply The NIST Cybersecurity Framework resulted from an intensive one year effort to synthesize cybersecurity experts best

thinking into a single framework of frameworks that can assure superior risk management It is well understood in the cybersecurity field that risks are constant and that the best approach to organizational cybersecurity is to manage those risks because no one can eliminate them The NIST Framework attempts to incorporate all the best various risk management and remediation practices into one coherent whole an ambitious goal in the complex cybersecurity field It is a multi layered spoke and wheel collection of ideas grouped along logical lines The Framework is conceptual and not technical making it difficult for many organizations to apply in the real world It doesn't help that NIST specifically avoided any technical recommendations when developing the Framework NIST instead chose to map its recommendations to a host of standards designed in house and at other standards setting bodies
