array of sources including philosophy media studies film studies media ecology and philosophy of technology When placed in the interpretive lenses of artifact instrument and tool digital media can be studied in a uniquely different way that pushes the boundaries on production distribution and communication and alters the way humans and technology connect with each other and the world In the first section Raw Materials Stacey O Neal Irwin examines pertinent concepts like digital media philosophy of technology phenomenology and postphenomenology In the second Feeling the Weave Irwin uses the postphenomenological framework to explore empirical cases focused on deep analysis of screens sound photo manipulation data mining aggregate news and self tracking Postphenomenological concepts like multistability variational theory microperception macroperception embodiment technological mediation are explored Digital Media demonstrates that digital media technologies and digital content are not neutral They texture the world in multiple and varied ways that transform human abilities augment experience and pattern the world in significant ways
