Computer Psychology

Dear E&MM,

I thoroughly enjoy your magazine, combining as it does my four great interests: music, electronics, computing and (since very recently) psychology. One of the most exciting possibilities in this broad area is the use of the computer in music as more than a workhorse for composition and re-gurgitation of it's user's own music, as a composer in its own right.

Martin Glover's letter in your September issue touched on this, and I feel obliged to correct some of the distortions which it contained.

Firstly, in describing the computer as working "on the principle of being able to answer the question - is it yes or no?" he is correct, but only as correct as someone who says that people work on the principle of electrons spinning round or leaving a nucleus of neutrons and protons. While both are true, neither describes the machine at a useful level.

Described in such forms, the computer indeed seems unlikely to be able to create a piece of music. However it would then also seem unlikely to be able to simulate paranoia so accurately that psychiatrists cannot reliably distinguish between "computer paranoid" dialogue and human paranoid dialogue. This has in fact been achieved (and is by no means the most impressive feat of Artificial Intelligence), so Mr Glover's description of a computer's functioning should not be taken as any indication of what computers are potentially capable of.

Mr Glover neglects the fact that there is a level at which the human brain operates in exactly this yes/no manner. So in theory there is nothing that the human brain can do that the computer cannot. Linked with the greater memory capabilities of the latter, the potential is astounding.

Mr Glover's second oversimplification is in stating that "at no time is there any input from the computer which has not originated from the programmer." Again, this is no more true of a computer than it could be of a human being. The computer can not only re-assemble segments of music fed to it, but also rewrite its own programs to invent new ways of doing this, or even make critical judgements of its constructions by comparison with other pieces

of music or in response to listener reaction.

Even if one argues that any output from such a program is still originating from the programmer, then one would surely have to accept that the same is true of Mozart whose ability to compose "unfolded" from his genetic make-up and its interaction with his musical and other experience, ie, simply on interaction of programming with input from outside.

In summary, it can be said that as there is no known mental function which cannot be simulated by a computer, it must be theoretically possible to produce a computer system capable of composing music. The problem in implementing such a system is twofold: the complexity of human music-composing procedures is manifest, and must be unravelled to be simulated; furthermore the amount of experience which such a system would have to accumulate (or be given as a package) in order to produce any music which 'feeling' is immense.

Clearly such a system is a long way off, but we must never lose sight of the possibility through reasons of ignorance or scepticism. Apart from straight composition, other possibilities exist; one which I've often found, amusing is that of a system which monitors listeners' mood changes via psychological measures and adapts its musical output accordingly to produce the ultimate in either mood-fitting or mood-shifting music!

Anyone interested in the possibilities of Artificial Intelligence would be well advised to read Margaret Boden's "Artificial Intelligence And Natural Man" (ISBN 0 85527 700 9).

Kitting Up

Dear E&MM,

I am planning to buy an electronic drum kit that I can use primarily in a studio environment. It needs to be electronic because of the type of music I play, the recording aspect, and the neighbours!

My budget limit is around £600, and I wonder if you could tell me what is available under that sum. I don't really need a programmable kit as it will only be used for recording - so it

would be an unnecessary expense.

Many thanks for a great magazine.

P.M. Haze
Beaconsfield
Bucks.

There are several types of kit that fall into this category - the mini kits and the full size drum kits. The first category covers the Matel Synaonics Drums (around £110), The Kit (at £100) and the added advantage of the extra add-ons and the M.P.C. (at around £599). The M.P.C. has the capability to interface with stagepads - which would allow you to build up a full system over a period of time - the extras would cost £200.

On the full kit side, your budget precludes the purchase of Simmons - but would allow for the new Klose Kit 2 from Monkey Tons - at about £499. (Reviewed in E&MM November 1983).

Drumming Dentist?

Dear Sirs,

I am in my final year of Dentistry at the University of Birmingham, and am preparing a dissertation on the role of Electronic Drums, comparing them with the role of the sound of real drums, in contemporary music.

I have used your magazine as a source for obtaining the names and addresses of manufacturers of Electronic Drums. Perhaps you could give me details or information on the Music Percussion Computer and any details of the new British products called the Desert Drums.

Yours faithfully,
G.A. Evans,

Llandudno, Gwynedd.
Further info on the MPC is available from MPC Electronics Ltd, The Gables, Shiloh, Road of Widdingham, Cambs CB4 5AG. Tel: 0554 60264. Desert Drums can be found at Alanlex Music, 1 Wallace Way, Hitchin, Herts. Tel: 0462 31513.

Great 'Synths & PCBs

Dear Sirs,

I have recently constructed both the SYNTOM II and SYNIAL, and have found them to be excellent in terms of sound quality and design. I would like to use them to form a large 'percussion' system, but find that buying ready-made PCBs adds unnecessarily to the cost when I can perfectly adequately produce the boards

myself. Therefore I hope you can advise me whether E&MM would be prepared to supply foil patterns by mail order - at a nominal fee, of course.

On the same subject I see from the latest issue, October 1983, that another correspondent has written to highlight your practice of not printing foil patterns; a policy which I'm sure you are aware is out of step with all other electronics magazines (even Elektor recently succumbed to pressure and now prints foil patterns for direct use when producing PCBs).

I'm sure the sale of PCBs is not the mainstay of E&MM's finances, as in my experience E&MM sells out faster than any other magazine!

Yours sincerely,
G.K. Prosser,
Clapton, London.

E&MM has no plans at this present stage to provide foil patterns for PCBs, even on a mail order basis. The reasoning behind this is simple: not enough people as yet have requested foil patterns, and due to the lack of space within the cramped project pages, we cannot afford to include them, as it would most certainly reduce the space normally allocated to our projects. All we can say is that if the trend does alter in favour of foil patterns, then we would re-consider our position.

Transposer

Dear Sirs,

Some users of the E&MM Transposer have experienced quantisation noise problems, which manifests itself on low frequency signals in the absence of any 'masking' high frequencies. Although this can at times sound rather like distortion, it is quite easy to remove (unlike distortion). Tim Orr overcame the problem in his excellent E&MM Digital Delay by boosting high frequencies on the input, and attenuating them on the output. This pre-emphasis/de-emphasis solution could not, however, be applied to the Transposer due to the spectrum shifting which takes place during transposition. In most cases, a little EQing, or even a little treble control tweaking will solve the problem. A more complete answer, though, would be to use the HSP1 Dynamic Noise Filter on the output, which will very effectively reduce the quantisation noise, while retaining the clarity of the signal.

Reviewing **Forum Magazine Readers Letters**: Unlocking the Spellbinding Force of Linguistics

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence. Its capacity to evoke emotions, stimulate contemplation, and stimulate metamorphosis is truly astonishing. Within the pages of "**Forum Magazine Readers Letters**," an enthralling opus penned by a very acclaimed wordsmith, readers attempt an immersive expedition to unravel the intricate significance of language and its indelible imprint on our lives. Throughout this assessment, we shall delve to the book is central motifs, appraise its distinctive narrative style, and gauge its overarching influence on the minds of its readers.

Forum Magazine Readers Letters Introduction

Forum Magazine Readers Letters Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Forum Magazine Readers Letters Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Forum Magazine Readers Letters : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Forum Magazine Readers Letters : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Forum Magazine Readers Letters Offers a diverse range of free eBooks across various genres. Forum Magazine Readers Letters Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Forum Magazine Readers Letters Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Forum Magazine Readers Letters, especially related to Forum Magazine Readers Letters, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Forum Magazine Readers Letters, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Forum Magazine Readers Letters books or magazines might include. Look for these in online stores or libraries. Remember that while Forum Magazine Readers Letters, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Forum Magazine Readers Letters eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Forum Magazine Readers Letters full book , it can give you a taste of the authors writing

style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Forum Magazine Readers Letters eBooks, including some popular titles.

FAQs About Forum Magazine Readers Letters Books

What is a Forum Magazine Readers Letters PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Forum Magazine Readers Letters PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Forum Magazine Readers Letters PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Forum Magazine Readers Letters PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobat's export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Forum Magazine Readers Letters PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
