

## Algebra 2B - Activity 10.2

1. Based on the grid below, identify each function below as being a polynomial of the degree:

2. Identify each of the functions below that are **not** polynomials. Explain what features of the graphs show that they are not polynomials by looking at the function's behavior as  $x \rightarrow \pm\infty$ . **Note:** you do not need to label all graphs.

This is being presented with the goal of the same direction

3. Graph each of the functions part 2 on a coordinate plane. If that does not work, use a graphing calculator or computer software to graph the function. If available, graph each function.

Remember, the functions that are not polynomials are not polynomials because they do not have a constant degree. The functions that are polynomials are not polynomials because they do not have a constant degree.
