## **Growing A Business Paul Hawken Pdf:**

*Growing a Business* Paul Hawken, 1987 Nearly everyone harbors a secret dream of starting or owning a business In fact 1 000 000 businesses start in the United States every year Many of them fail but enough succeed so that small businesses are now adding millions of jobs to the economy at the same time that the Fortune 500 companies are actually losing jobs Paul Hawken entrepreneur environmentalist and bestselling author wrote *Growing a Business* for those who have set out to make their dream a reality He knows what he is talking about In the early 1970s while he was still in his twenties he founded Erewhon the largest distributor of natural foods Later he founded Smith Hawken the premier garden tool company Using examples like Patagonia and Ben Jerry's shows that the successful business is an expression of an individual person The most successful business your idea for a business will grow from something that is deep within you something that can't be stolen by anyone because it is so uniquely yours that anyone else who tried to execute your idea would fail He also dispels the myth of the risk taking entrepreneur The purpose of business he points out is not to take risks but rather to get something done

**Natural Capitalism** Paul Hawken, Amory B. Lovins, L. Hunter Lovins, 1999 The first Industrial Revolution inaugurated 200 years of unparalleled material development for humankind But the costs and the consequences are now everywhere evermore apparent the living systems on which we depend are in retreat Forests topsoil grasslands wetlands oceans coral reefs the atmosphere aquifers tundra and biodiversity are limiting factors the natural capital on which all economic activity depends And they are all in decline Add to that a doubling of the world's population and a halving of available per capita resources in the first 50 years of the 21st century and the inevitability of change is clear This work offers forms of industry and commerce that can not only enhance enormously the wellbeing of the world's growing population but will reverse the destruction and pollution of nature and restore the natural processes so vital to the future The book introduces four central and interrelated strategies necessary to perpetuate abundance avert scarcity and deliver a solid basis for social development The first of these is Radical Resource Productivity getting two four or even ten times as much from the same quantities of materials and energy A revolution in efficiency that provides the most immediate opportunities for businesses to grow and prosper The second strategy is Ecological Redesign eliminating the very idea of waste by designing industrial systems on the model of ecological ones Instead for example of digging minerals out of the ground only to return them to landfill at the end of the product cycle industrial processes will be designed to reuse materials constantly in closed circles The third strategy involves creating A Service and Flow Economy shifting from an economy of goods and purchases to one of service and flow and redefining the relationship between producer and consumer Affluence will no longer be measured by acquisition and quantity but by the continuous receipt of quality utility and performance The final strategy is Investing in Natural capital reversing the worldwide ecosystem destruction to restore and expand the stocks of natural capital If industrial systems are to supply an increasing flow of services in the future the vital flow of services from living systems will have to be maintained or increased as well
