Practical Guide to Statistical Quality Improvement Opening Up the Statistical Toolbox is designed as a reference guide for
the engineer supervisor and manager The intent of the text is to present conventional statistical quality improvement tools in
a user friendly form We have worked to take some of the mystique out of the statistics and help others put these powerful
tools to effective use in a Total Quality Management TQM environment This isn't a text on TQM TQM has three
elements as shown in Figure i 1 1 Creating the environment 2 The continuous improvement toolbox 3 Employee
empowerment This text focuses almost exclusively on the middle element the continuous improvement CI toolbox Further
Opening Up the Statistical Toolbox does not present a complete set of tools intended to fill the CI toolbox only the statistical
tools and some of the basic team process tools are covered The CI toolbox in reality will never get filled A comprehensive
toolbox will include extensive team process skills and technology specific tools complimentary to the statistical tools included
here THE THREE KEY ELEMENTS OF TQM THE CONTINUOUS IMPROVEMENT TOOLBOX EMPLOYEE EMPOWERMENT
