High Value Fermentation Products, Volume 1 Saurabh Saran, Vikash Babu, Asha Chaubey, 2019-03-12 Green technologies are no longer the future of science but the present. With more and more mature industries such as the process industries making large strides seemingly every single day and more consumers demanding products created from green technologies it is essential for any business in any industry to be familiar with the latest processes and technologies. It is all part of a global effort to go greener and this is nowhere more apparent than in fermentation technology. This book describes relevant aspects of industrial scale fermentation an expanding area of activity which already generates commercial values of over one third of a trillion US dollars annually and which will most likely radically change the way we produce chemicals in the long term future. From biofuels and bulk amino acids to monoclonal antibodies and stem cells they all rely on mass suspension cultivation of cells in stirred bioreactors which is the most widely used and versatile way to produce. Today a wide array of cells can be cultivated in this way and for most of them genetic engineering tools are also available. Examples of products operating procedures engineering and design aspects economic drivers and cost and regulatory issues are addressed. In addition there will be a discussion of how we got to where we are today and of the real world in industrial fermentation. This chapter is exclusively dedicated to large scale production used in industrial settings.

Extracting Bioactive Compounds for Food Products M. Angela A. Meireles, 2008-12-16 The demand for functional foods and nutraceuticals is on the rise leaving product development companies racing to improve bioactive compound extraction methods a key component of functional foods and nutraceuticals development. From established processes such as steam distillation to emerging techniques like supercritical fluid technology.

Natural Product Extraction Juliana M Prado, Mauricio A Rostagno, 2022-07-20 Natural products are used by the food pharmaceutical and cosmetics industries and extraction technologies and potential applications for plant extracts are of interest to many industrial sectors. Extraction of natural products in an economic and environmentally friendly way is of high importance to all industries involved. The second edition of this book presents an updated holistic in depth view of the more environmentally benign techniques available for the extraction of natural products along with their newest applications and case studies. Conventional and emerging extraction techniques are discussed in detail. New topics include enzymes pulsed electric energy and on line in line analysis. Written for academics and industrialists working in both natural product extraction and green chemistry this new edition provides a valuable update on current trends in the field.

Handbook of Natural Bioactive Compounds Rakesh K. Sindhu, Sumitra Singh, Dinesh Kumar, 2026-03-02 Natural bioactive compounds have a wide range of therapeutic potential. They are the basis for many life saving drugs and have the potential to treat and manage a variety of diseases. Handbook of Natural Bioactive Compounds provides a broad overview of techniques for the extraction isolation and identification of bioactive compounds from natural sources such as plants marine organisms and microorganisms.

Forest Fungi Ahmed M. Abdel

Azeem, Marieka Gryzenhout, Soumya Ghosh, Teroj A. Mohammed, 2024-09-04 Forest Fungi Biodiversity Conservation Mycoforestry and Biotechnology explores sustainable option aspects of forest fungal research from the selection of hosting plants isolation identification fermentation identification of secondary metabolites omics tools for better understanding the plant fungus Interactions Forests are the world's greatest repository of terrestrial biomass soil carbon and biodiversity They provide a variety of provisioning supporting regulatory and cultural ecosystem services which are crucial for the survival of human beings Fungi play key roles in forest ecosystems as mutualists saprobes and pathogens Focuses on the biodiversity of forest fungi and their potential biotechnological application for sustainable development Includes high quality illustrations and figures for enhanced ease of understanding the process mechanism

WASTES: Solutions, Treatments and Opportunities IV Candida Vilarinho, Fernando Castro, Margarida J Quina, 2023-09-06 WASTES Solutions Treatments and Opportunities IV contains selected papers presented at the 6th edition of the International Conference Wastes Solutions Treatments and Opportunities that took place on 6-8 September 2023 in Coimbra Portugal The Wastes conference which takes place biennially is a prime forum for sharing innovations technological developments and sustainable solutions for waste management and recycling sectors worldwide with the participation of experts from academia and industry The papers included in this book cover a wide range of topics including Management of waste streams Environmental economic and social aspects in waste management Logistics policies regulatory constraints and markets in waste management Waste to energy technologies Life cycle assessment and carbon footprint Biological treatment techniques Waste treatment and valorization technologies Circular economy and industrial symbioses Smart technologies and digital tools in waste management Recycling of wastes and resources recovery Wastes refineries Food waste management and bioeconomy Plastic waste impacts management strategies and solutions Wastes as critical raw materials resources WASTES Solutions Treatments and Opportunities IV is aimed at academics and professionals involved in waste management and recycling sectors globally

Herbs, Spices and Medicinal Plants Mohammad B. Hossain, Nigel P. Brunton, Dilip K. Rai, 2020-08-17 The latest research on the health benefits and optimal processing technologies of herbs and spices This book provides a comprehensive overview of the health benefits analytical techniques used and effects of processing upon the physicochemical properties of herbs and spices Presented in three parts it opens with a section on the technological and health benefits of herbs and spices The second part reviews the effect of classical and novel processing techniques on the properties of herbs spices The third section examines extraction techniques and analytical methodologies used for herbs and spices Filled with contributions from experts in academia and industry Herbs Spices and Medicinal Plants Processing Health Benefits and Safety offers chapters covering thermal and non thermal processing of herbs and spices recent developments in high quality drying of herbs and spices conventional and novel techniques for extracting bioactive compounds from herbs and spices and approaches to analytical techniques It also examines purification and isolation techniques for enriching bioactive

phytochemicals medicinal properties of herbs and spices synergy in whole plant medicine potential applications of polyphenols from herbs and spices in dairy products biotic and abiotic safety concerns and adverse human health effects and regulation of metal contaminants in terrestrial plant derived food and phytopharmaceuticals Covers the emerging health benefits of herbs and spices including their use as anti diabetics anti inflammatories and anti oxidants Reviews the effect of classical and novel processing techniques on the properties of herbs and spices Features informed perspectives from noted academics and professionals in the industry Part of Wiley s new IFST Advances in Food Science series Herbs Spices and Medicinal Plants is an important book for companies research institutions and universities active in the areas of food processing and the agri food environment It will appeal to food scientists and engineers environmentalists and food regulatory agencies
