ATA5723/ATA5724/ATA5728

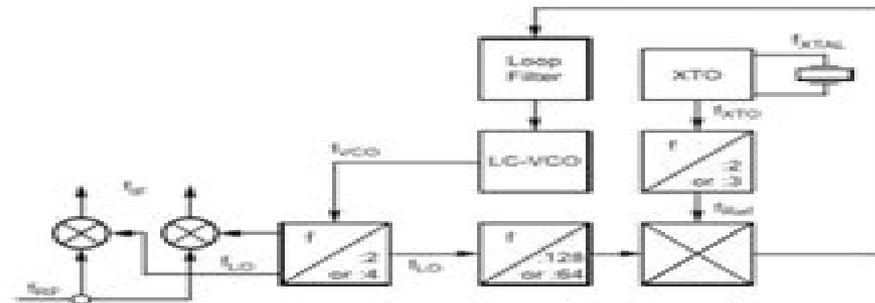

Introduction

The UHF receiver ATA5723, ATA5724, and ATA5728 are designed specially for automotive application like Remote Keyless Entry as well as Tire Pressure Monitoring System. These receivers are upgrades of ATA5743 and ATA5760. They have compatible pinning that allows the development of one layout for applications in three different ISM (Industrial Scientific Medical) frequency bands. The frequency ranges are 312.5MHz to 317.5MHz, 431.5MHz to 436.5MHz and 868MHz to 870MHz. Another benefit of the receiver is the reuse of the software from Atmel's older receiver, the ATA5743. Additional features include the RSSI output, the pierce crystal oscillator achieving a better oscillation margin, an improved sensitivity as well as the image rejection.

The purpose of this application note is to give a designer some hints how to start developing a receiver module with ATA5723/ATA5724/ATA5728.
