**Abstract.** This paper presents ongoing research on the modelling of expressive gesture in multimodal interaction and on the development of multimodal interactive systems explicitly taking into account the role of non-verbal expressive gesture in the communication process. In this perspective, a particular focus is on dance and music as first-class conveyors of expressive and emotional content. Research outputs include (i) computational models of expressive gesture, (ii) validation by means of continuous ratings on spectators exposed to real artistic stimuli, and (iii) novel hardware and software components for the EyeWeb open platform ([www.eyeweb.it](http://www.eyeweb.it)), such as the recently developed Expressive Gesture Processing Library. The paper starts with a definition of expressive gesture. A unifying framework for the analysis of expressive gesture is then proposed. Finally, two experiments on expressive gesture in dance and music are discussed. This research work has been supported by the EU IST project MEGA (Multisensory Expressive Gesture Applications, [www.mega-project.org](http://www.mega-project.org)) and the EU MOSART TMR Network.

## 1. Introduction

*Expressive gesture* is a key concept in our research (Casurri et al., 2001). This paper tries to face it and introduces two experiments aiming at understanding the non-verbal mechanisms of expressive/emotional communication.

Several definitions of gesture exist in the literature. The most common use of the term is with respect to natural gesture, which is defined as a support to verbal communication. For Cassel and colleagues (1990) "A natural gesture means the types of gestures spontaneously generated by a person telling a story, speaking in public, or holding a conversation". McNeill (1992) in his well-known taxonomy divides the natural gestures generated during a discourse in four different categories: iconic, metaphoric, deictic, and beats. In a wider perspective Kurtzboch and Hulstijn (1990) define gesture as "a movement of the body that conveys information". A survey and a discussion of existing definitions of gesture can be found in (Cadoré and Wanderley, 2000).

In artistic contexts and in particular in the field of performing arts, gesture is often not intended to denote things or to support speech as in the traditional framework of natural gesture, but the information it contains and conveys is related to the

Musical Robots and Interactive Multimodal Systems Jorge Solis, Kia Ng, 2011-07-25 Musical robotics is a multi and trans disciplinary research area involving a wide range of different domains that contribute to its development including computer science multimodal interfaces and processing artificial intelligence electronics robotics mechatronics and more A musical robot requires many different complex systems to work together integrating musical representation techniques expressions detailed analysis and controls for both playing and listening The development of interactive multimodal systems provides advancements which enable enhanced human machine interaction and novel possibilities for embodied robotic platforms This volume is focused on this highly exciting interdisciplinary field This book consists of 14 chapters highlighting different aspects of musical activities and interactions discussing cutting edge research related to interactive multimodal systems and their integration with robots to further enhance musical understanding interpretation performance education and enjoyment It is dichotomized into two sections Section I focuses on understanding elements of musical performance and expression while Section II concentrates on musical robots and automated instruments **Musical Robots and Interactive Multimodal Systems** provides an introduction and foundation for researchers students and practitioners to key achievements and current research trends on interactive multimodal systems and musical robotics

**Recent Perspectives on Gesture and Multimodality** Anabela Cruz-Santos, Isabel Galhano-Rodrigues, Elena Zagar Galvão, 2019-07-14 What is gesture and what does it do What is the meaning of multimodality What do these concepts signify within the different theoretical approaches to interaction and communication among human beings Why do we study gesture and multimodality The thirteen chapters that make up this volume provide answers to these questions They bring together an eclectic set of recent studies on visible bodily actions conducted by junior and senior researchers and are a testimony to the curiosity and vitality that have always distinguished gesture studies This young yet rapidly growing field investigates the semiotic features of gesture in relation to speech as integral parts of utterances the different uses of gestures with and without speech such as gestures in language acquisition gestures in the performing arts music dance theatre and gestures in Artificial Intelligence

Human Aspects in Ambient Intelligence Tibor Bosse, Diane J. Cook, Mark Neerincx, Fariba Sadri, 2013-09-13 This book presents recent developments in the field of human aspects in Ambient Intelligence This field and the associated workshop series addresses multidisciplinary aspects of AmI with human directed disciplines such as psychology social science neuroscience and biomedical sciences The aim of the workshop series is to get researchers together from these human directed disciplines or working on cross connections of AmI with these disciplines The focus is on the use of knowledge from these disciplines in AmI applications in order to support humans in their daily living in medical psychological and social respects The book plays an important role to get modellers in the psychological neurological social or biomedical disciplines interested in AmI as a high potential application area for their models From the other side the book may make researchers in Computer Science and

Artificial and Ambient Intelligence more aware of the possibilities to incorporate more substantial knowledge from the psychological neurological social and biomedical disciplines in AmI architectures and applications
