Embedded C Coding Standard Michael Barr,2018-06-12 Barr Group s Embedded C Coding Standard was developed to help firmware engineers minimize defects in embedded systems Unlike the majority of coding standards this standard focuses on practical rules that keep bugs out including techniques designed to improve the maintainability and portability of embedded software The rules in this coding standard include a set of guiding principles as well as specific naming conventions and other rules for the use of data types functions preprocessor macros variables and other C language constructs Individual rules that have been demonstrated to reduce or eliminate certain types of defects are highlighted The BARR C standard is distinct from yet compatible with the MISRA C Guidelines for Use of the C Language in Critical Systems Programmers can easily combine rules from the two standards as needed *Static Analysis* Andreas Podelski,2018-08-28 This book constitutes the refereed proceedings of the 25th International Static Analysis Symposium SAS 2018 held in Freiburg Germany in August 2018 The 18 papers presented in this volume were carefully reviewed and selected from 37 submissions The contributions cover a variety of multi disciplinary topics in abstract domains program verification bug detection compiler optimization program understanding and software maintenance *Intelligent Technical Systems* Natividad Martínez Madrid,Ralf E.D. Seepold,2009-02-18 Intelligent technical systems are networked embedded systems incorporating real time capacities that are able to interact with and adapt to their environments These systems need innovative approaches in order to meet requirements like cost size power and memory consumption as well as real time compliance and security Intelligent Technical Systems covers different levels like multimedia systems embedded programming middleware platforms sensor networks and autonomous systems and applications for intelligent engineering Each level is discussed by a set of original articles summarizing the state of the art and presenting a concrete application they include a deep discussion of their model and explain all design decisions relevant to obtain a mature solution
