

Systematic Inventive Thinking (SIT)

The traditional view of creativity is that it's unstructured and doesn't follow rules or patterns. That you need to think outside the box, brainstorming without constraint, until you find a solution. That you should go wild making analogies to things that have nothing to do with your products, services or processes.

In fact, the opposite is true. **Creative ideas hide inside the box.**

SIT is an innovation method that harnesses **five thinking patterns** that mankind has used for thousands of years.

Surprisingly, the majority of new, inventive, and successful products result from just five patterns: **subtraction, division, multiplication, task unification and attribute dependency.** These patterns form the basis of SIT.
