Rance Cleaveland,2003-05-21 ETAPS 99 is the second instance of the European Joint Conferences on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences This year it comprises ve conferences FOSSACS FASE ESOP CC TACAS four satellite workshops CMCS AS WAGA CoFI seven invited lectures two invited tutorials and six contributed tutorials The events that comprise ETAPS address various aspects of the system velopment process including speci cation design implementation analysis and improvement The languages methodologies and tools which support these tivities are all well within its scope Dieren t blends of theory and practice are represented with an inclination towards theory with a practical motivation on one hand and soundly based practice on the other Many of the issues involved in software design apply to systems in general including hardware systems and the emphasis on software is not intended to be exclusive   **The Cache Coherence Problem in Shared-Memory Multiprocessors** Igor Tartalja,Veljko Milutinović,1996-02-13 Almost all software solutions are developed through academic research and implemented only in prototype machines leaving the field of software techniques for maintaining the cache coherence widely open for future research and development This book is a collection of

all the representative approaches to software coherence maintenance including a number of related efforts in the performance evaluation field The book presents a selection of 27 papers dealing with state of the art software solutions for cache coherence maintenance in shared memory multiprocessors It begins with a set of four introductory readings that provides a brief overview of the cache coherence problem and introduces software solutions to the problem The text defines and illustrates static and dynamic software schemes techniques for modeling performance evaluation mechanisms and performance evaluation studies The book is intended for the experienced reader in computer engineering but possibly a novice in the topic of cache coherence It also provides an in depth understanding of the problem as well as a comprehensive overview for multicomputer designers computer architects and compiler writers In addition it is a software coherence reference handbook for advanced undergraduate and typical graduate students in multiprocessing and multiprogramming areas *Theory and Applications of Satisfiability Testing* Fahiem Bacchus,2005-06-09 This book constitutes the refereed proceedings of the 8th International Conference on Theory and Applications of Satisfiability Testing SAT 2005 held in St Andrews Scotland in June 2005 The 26 revised full papers presented together with 16 revised short papers presented as posters during the technical programme were carefully selected from 73 submissions The whole spectrum of research in propositional and quantified Boolean formula satisfiability testing is covered including proof systems search techniques probabilistic analysis of algorithms and their properties problem encodings industrial applications specific tools case studies and empirical results Applied XML Solutions Benoît Marchal,2000 Artful Making offers the first proven research based framework for engineering ingenuity and innovation This book is the result of a multi year collaboration between Harvard Business School professor Robert Austin and leading theatre director and playwright Lee Devin Together they demonstrate striking structural similarities between theatre artistry and production and today s business projects and show how collaborative artists have mastered the art of delivering innovation on cue on immovable deadlines and budgets These methods are neither mysterious nor flaky they are rigorous precise and with this book s help absolutely learnable and reproducible They rely on cheap and rapid iteration rather than on intensive up front planning and with the help of today s enabling technologies they can be applied in virtually any environment with knowledge based outputs Moreover they provide an overarching framework for leveraging the full benefits of today s leading techniques for promoting flexibility and innovation from agile development to real options Logic Programming John Lloyd,1995 The International Logic Programming Symposium is one of two major international conferences sponsored by the Association of Logic Programming Both conferences are held annually The theme for the 1995 conference was Declarative Systems particularly the integration of the logic programming functional programming and object oriented programming paradigms **The C++ Answer Book** Tony L. Department of Computer Science,1997 Abstract The development of high performance numerical algorithms and their effective use in application codes is an iterative process involving the refinement of the algorithms and their implementations that continues during the lifetime of the algorithm Knowledge and expertise from the areas of numerical analysis computer software compilers machine architecture and applications are required during the development To improve this process the FALCON environment was developed to combine the analysis techniques from restructuring compilers with the algebraic techniques from numerical analysis In this thesis interactive techniques that were developed to extend the FALCON environment are described These techniques allow the developer to improve the analysis of the algorithm to restructure the algorithm using transformation patterns to utilize additional information about structures within the data and to control the generation of the target code The experimental results show that the codes generated by

the interactive techniques have better performance than those generated automatically In addition the environment was extended to support the generation of C code When the C code generated by FALCON is compared to the code generated by other MATLAB translators the C code is typically faster However when compared against the Fortran 90 code generated by FALCON the C code is usually slower   **ACM SIGPLAN Notices** ,2004-03   *The Journal of the Astronautical Sciences* ,1998   **Report CS-R** ,1984   **Computer Sciences** Roger R.
