Chakraborti, 1987 High Technology and International Competitiveness Romesh Diwan, Chandana Chakraborty, 1991-11-30

Following World War II the U S manufacturing sector emerged as the dominant industrial force in the world in virtually all areas including productivity market share innovations and capital investments Though other countries have caught up with and surpassed the United States in many industries Romesh Diwan and Chandana Chakraborty argue that America can recapture its dominant role by moving forcefully into high technology industries In this work they examine competitiveness in a range of high technology enterprises analyzing the industries as an aggregate as well as through three specific examples semi conductors telecommunications and computers The authors provide a complete understanding of the technical changes and developments that are taking place in U S high technology and offer guidance to policy makers in promoting competitive strength Their work defines and quantifies the high tech industrial sector of the U S economy and analyzes the productivity of this sector by utilizing a translog cost function which provides information about the structure of the input output relations in a particular industry Using these functions Diwan and Chakraborty answer quantitatively a number of questions relating to the growth of various inputs productivities and outputs which lead to conclusions regarding the structure of production costs

and capacity in U S industry Their conclusions that technical change is biased in the main in favor of capital and material and that capital and skilled labor are complements are consistent with new ideas and theories in the field This work will be a valuable reference source for professional economists and policy experts as well as for scholars and students in international trade finance and development
