High-Performance Scientific Computing Michael W. Berry,Kyle A. Gallivan,Efstathios Gallopoulos,Ananth Grama,Bernard Philippe,Yousef Saad,Faisal Saied,2012-01-18 This book presents the state of the art in parallel numerical algorithms applications architectures and system software The book examines various solutions for issues of concurrency scale energy efficiency and programmability which are discussed in the context of a diverse range of applications Features includes contributions from an international selection of world class authorities examines parallel algorithm architecture interaction through issues of computational capacity based codesign and automatic restructuring of programs using compilation techniques reviews emerging applications of numerical methods in information retrieval and data mining discusses the latest issues in dense and sparse matrix computations for modern high performance systems multicores manycores and GPUs and several perspectives on the Spike family of algorithms for solving linear systems presents outstanding challenges and developing technologies and puts these in their historical context **Analysis and Design of Scalable Parallel**

**Algorithms for Scientific Computing** Anshul Gupta,1995 *Applied Parallel Computing. Industrial Computation and Optimization* Jerzy Waśniewski,1996 This book constitutes the refereed proceedings of the Third International Workshop on Applied Parallel Computing PARA 96 held in Lyngby Denmark in August 1996 The volume presents revised full versions of 45 carefully selected contributed papers together with 31 invited presentations The papers address all current aspects of applied parallel computing relevant for industrial computations The invited papers review the most important numerical algorithms and scientific applications on several types of parallel machines **Introduction to Parallel Computing** Vipin

Kumar,1994 *Mathematics of Computing Parallelism* **Fast and Accurate Finite-Element Multigrid Solvers for PDE Simulations on GPU Clusters** Dominik Göddeke,2011 This dissertation demonstrates that graphics processors GPUs as representatives of emerging many core architectures are very well suited for the fast and accurate solution of large sparse linear systems of equations using parallel multigrid methods on heterogeneous compute clusters Such systems arise for instance in the discretisation of elliptic partial differential equations with finite elements Fine granular parallelisation techniques and methods to ensure accuracy are developed that enable at least one order of magnitude speedup over highly

tuned conventional CPU implementations without sacrificing neither accuracy nor functionality

**Parallel Algorithms for Irregular Problems: State of the Art** Alfonso Ferreira, José Rolim, 2013-04-17 Efficient parallel solutions have been found to many problems Some of them can be obtained automatically from sequential programs using compilers However there is a large class of problems irregular problems that lack efficient solutions IRREGULAR 94 a workshop and summer school organized in Geneva addressed the problems associated with the derivation of efficient solutions to irregular problems This book which is based on the workshop draws on the contributions of outstanding scientists to present the state of the art in irregular problems covering aspects ranging from scientific computing discrete optimization and automatic extraction of parallelism Audience This first book on parallel algorithms for irregular problems is of interest to advanced graduate students and researchers in parallel computer science
