AI Strategies for Social Entrepreneurship and Sustainable Economic Development Yu, Poshan,Wong, Steve K.M.,Prabhakar, Akhilesh Chandra,2024-12-26 While the 20th century saw massive successes in terms of industrialization much of the world s population was excluded from the spoils of these endeavors and often directly exploited in their achievement Simultaneously the environmental impact of these practices has done irreparable harm to our world Now nearly a quarter through the 21st century we must ensure that the same mistakes are not repeated and that we use recent technological developments such as artificial intelligence to more evenly distribute earnings and resources while also ensuring that our environment is protected *AI Strategies for Social Entrepreneurship and Sustainable Economic Development* explores the intersection of inclusive innovation artificial intelligence AI strategies social entrepreneurship and sustainable economic development The book delves into how AI technologies can be leveraged to promote social inclusion drive entrepreneurship and foster sustainable economic growth in diverse contexts This book contribute to the existing literature by providing insights into the potential of AI in advancing inclusive innovation and sustainable development Offering practical strategies case studies and best practices this book is an excellent resource for policymakers researchers practitioners and students interested in the intersection of AI social entrepreneurship and economic development

Financing of Sustainable Development Goals (SDGs) Rashmi Arora,Tapan Sarker,2025-02-13 The economic and social impact of Covid 19 pandemic both on developing and developed countries has been significant In addition to the impact of the pandemic the current Ukraine war has also led to severe supply chain disruptions leading to a sharp increase in food and commodity prices globally Due to a combination of external shocks and the impact of the pandemic global economic growth slowed down and is projected to continue to decline The above factors have led to a sharp increase in government expenditure constraining both developed and developing countries fiscal capacity This has further implications for the achievement of SDGs especially for low income countries The challenge for developing countries in the current scenario is to mobilize adequate resources both from domestic and international sources not just for the achievement of SDGs as such but

also to sustain the livelihoods health and welfare of people This book aims to examine some of these issues in the context of developing countries Foreword to Financing of the Sustainable Development Goals SDGs Challenges and Opportunities Saleem H Ali As we approach the 2030 milestone that was set forth by the United Nations to attain seventeen key development goals financing remains the ultimate challenge to their attainment International conflicts have further stretched public sector discretionary spending on development and global uncertainty on economic growth has stymied private sector investment in a range of key infrastructure projects At this pivotal moment Arora and Sarker have assembled a timely anthology of leading experts from both the Global North and South to both evaluate past performance as well as project possible solutions to address the financing gap The twelve contributing chapters span a range of geographies as well as themes around the SDGs An impressive feature of this volume is its willingness to engage with multidimensional aspects of the SDG agenda beyond just the usual multilateral donor s space They also cover key aspects of development from climate financing to fintech and methodologies for evaluating impact This panoramic coverage makes the book particularly well suited for courses on sustainable development as well as for practitioners to educate themselves about ways to mobilize finance Having served on the Scientific and Technical Advisory Panel STAP of the Global Environment Facility GEF for four years I had a chance to review a range of large proposals with multiple financing sources submitted to the GEF Trust Fund administered by the World Bank I had a chance to observe the ways in which financing was patched together for many projects to allow for upscaling Yet often there were still major gaps or synergies could not be realized across sectors because of the way the funding was delineated This book will help to address many of these challenges with fresh ideas from experienced academics and practitioners It has the potential for making a lasting impact on the global development agenda Saleem H Ali Member of the United Nations International Resource Panel Chair and Distinguished Professor Department of Geography University of Delaware USA
