[Building Scalable and Smart Multimedia Applications on the Semantic Web](#) Michael Hausenblas, 2009-05-04 Doctoral Thesis Dissertation from the year 2009 in the subject Business economics Information Management grade 1.0 University of Graz language English abstract The Semantic Web has become reality over the past couple of years While certain practical topics such as interoperability etc have at least partially been addressed scalability and expressivity issues regarding the utilisation of multimedia metadata on the Semantic Web are still widely neglected However existing Web 2.0 applications handling millions of multimedia assets are starting to take advantage of Semantic Web technologies This work contributes to design decisions regarding scalable and smart multimedia applications on the

Semantic Web Based on an analysis of practical issues stemming from diverse projects and activities the author has participated in over the past four years three areas have been identified namely i performance and scalability issues on the data access level ii the effective and efficient representation of multimedia content descriptions and iii the deployment of multimedia metadata on the Semantic Web The three research areas have as its common base the trade off between expressivity and scalability We present our findings regarding scalable yet expressive Semantic Web multimedia applications in a number of practical settings and discuss future directions such as interlinking multimedia

SOA with Java Thomas Erl, Andre Tost, Satadru Roy, Philip Thomas, Raj Balasubramanian, David Chou, Thomas Plunkett, 2014-06-17 An outstanding depth and breadth resource for IT architects and Java professionals to understand and apply the marriage of SOA and modern Java. Antonio Bruno Enterprise Architecture and Strategy digitalStrom A great self-contained book on SOA using flexible Java implementations. Roger Stoffers Hewlett Packard Provides clarity on abstract concepts and is filled with concrete examples of implementing SOA principles in Java environments. Sanjay Singh Certified SOA Architect provides a holistic comprehensive view on leveraging SOA principles and architecture for building and deploying performant Java services. Suzanne D Souza KBACE Technologies Thomas Erl's series of books on services technology have shaped, influenced, and strengthened a whole community of enterprise and solution architects, thinking, and solution development, and the much-awaited SOA with Java book is an excellent addition to the series. It is a must-read. Lalatendu Rath Wipro Technologies The Definitive Guide to Building Service Oriented Solutions with Lightweight and Mainstream Java Technologies Java has evolved into an exceptional platform for building Web-based enterprise services. In SOA with Java, Thomas Erl and several world-class experts guide you in mastering the principles, best practices, and Java technologies you need to design and deliver high-value services and service-oriented solutions. You'll learn how to implement SOA with lightweight frameworks, mainstream Java services technologies, and contemporary specifications and standards. To demonstrate real-world examples, the authors present multiple case study scenarios. They further demystify complex concepts with a plain English writing style. This book will be valuable to all developers, analysts, architects, and other IT professionals who want to design and implement Web-based service-oriented architectures and enterprise solutions with Java technologies.

Topic Areas: Applying modern service orientation principles to modern Java technology platforms; Leveraging Java infrastructure extensions relevant to service-oriented solutions; Exploring key concepts associated with SOA and service orientation within the context of Java; Reviewing relevant Java platforms, technologies, and APIs; Understanding the standards and conventions that REST and SOAP services are built upon in relation to Java implementations; Building Java Web-based services with JAX-WS and JAX-RS; Applying the eight key principles of service orientation design using Java tools and technologies; Creating Java utility services; architectural design and implementation issues; Constructing effective entity services; service contracts; messages; data access and processing; Constructing task services including detailed guidance on service composition; Using ESBs to support infrastructure requirements in complex services ecosystems.
