

Conceptual Physics Practice Final Exam, Semester 1

Tips for Successful Test-Taking:

1. Take a few deep breaths and relax. The calmer you feel, the more you will remember.
 2. Before beginning a problem, identify the topic (forces, kinematics, momentum, energy, or skills). That way you know what study guide to look at if you get stuck.
 3. For numerical problems, list the information you've been given and what you need to find. If you get stuck, refer to the tips listed on the study guide.
 4. If you get really stuck, refer to #1. Then skip the problem and come back to it later.
 5. Before you turn in your exam, be sure to go back and finish any questions you've skipped. It's also a good idea to check your answers – you can catch careless mistakes this way.
-

1. What is the direction of the net force on the following car?

.....

- a. Left
 - b. Right
 - c. There is no net force
 - d. It is impossible to know
2. A 4.0-kg cat is running along a fence 2.0 meters above the ground. The cat has 130 joules of total mechanical energy. The speed of the cat is closest to
