Comparison Between SDP in Cloud PaaS and Traditional Hosting Platform Samuel Chinenyeze,2013 API centric cloud PaaS is concerned with cloud platform as a service delivery that provisions development and deployment tools specific to underlying cloud provider s infrastructure for developing cloud aware applications With the advent of API centric cloud PaaS and the new approach to software development it poses there still stands some uncertainties as to whether development processes for these platforms are same as traditional application development and deployment processes The significance of this work is evaluating and establishing a comparison of the software development process between the API centric cloud PaaS and traditional development platform following the MVC design pattern with comparison case studies as

Google App Engine and Glassfish respectively An experimental approach was adopted for this research and empirical results show that traditional development platform may require more processes at selected development stages and consequently more flexibility from an MVC perspective compared to API centric cloud PaaS development depending on the nature of requirement or deterministic factors

Cloud Foundry Duncan C. E. Winn,2016-07-18 What exactly is a cloud native platform It s certainly a hot topic in IT as enterprises today assess this option for developing and delivering software quickly and repeatedly This O Reilly report explains the capabilities of cloud native platforms and examines the fundamental changes enterprises need to make in process organization and culture if they re to take real advantage of this approach Author Duncan Winn focuses on the open source platform Cloud Foundry one of the more prominent cloud native providers You ll learn how cloud native applications are designed to be infrastructure unaware so they can thrive and move at will in the highly distributed and constantly evolving cloud environment With this report you ll explore Technical driving forces that are rapidly changing the way organizations develop and deliver software today How key concepts underpinning the Cloud Foundry platform leverage each of the technical forces discussed How cloud native platforms remove the requirement to perform undifferentiated heavy lifting such as provisioning VMs middleware and databases Why cloud native platforms enable fast feedback loops as you move from agile development to agile deployment Recommended changes and practical considerations for organizations that want to build cloud native applications

VMware Cloud Foundry Andrew M. Isaacs,Sam Kanakamedala,Lisa Reed,2012 In April 2011 VMware announced the worlds first open Platform as a Service PaaS offering Cloud Foundry The service provided a platform for building deploying and running cloud applications It offered developers a choice of developer frameworks infrastructure services and clouds to which to deploy applications Cloud Foundry was intended to allow software developers to focus on applications development rather than infrastructure Jerry Chen VMwares Vice President of Cloud and Application Services was responsible for identifying the appropriate business model for Cloud Foundry He knew that success for the service would be measured both in terms of establishing a vibrant ecosystem and building a successful business on the platform itself He and his team needed to find the right balance between VMwares own in house Software as a service SaaS offerings and potential partners or acquisitions

A Platform as a Service for Concurrency-based Applications Provisioning in Internet of Things Deepak Kumar Aggarwal,2018 The Internet of Things IoT is becoming ubiquitous with

sensor nodes getting more intelligent and capable of transmitting their processed data to a cloud. Concurrency based applications play a vital role in the rise of the IoT. A concurrency based application has multiple processes running independently and interacting with each other. An example of the concurrency based application in IoT is wildfire management application. In a forest various sensor devices are deployed in the different areas. The processes of the wildfire management application are running on the sensor devices of different areas independently. The process of a particular area monitors the temperature and interacts with the processes in the neighboring areas. This interaction is based on the fire contour algorithm which allows the application to provide the real time direction and evolution of the fire in case of the fire incident. Cloud computing is a paradigm for swiftly provisioning a shared pool of configurable resources e.g. services, applications, network and storage on demand. Cloud computing can help to tackle the challenges of IoT based applications provisioning by offering the Platform as a Service (PaaS). Therefore developers of such concurrency based applications can use cloud's PaaS for faster development as well as cost efficiency. However the PaaS faces several challenges at the time of provisioning of concurrency based application i.e. development, deployment and management. For the concurrency based application development phase PaaS should support the various API and frameworks for the development of multiple processes of the concurrency based application which helps to start development quickly. For the deployment of the concurrency based application the PaaS must offer the facility of hosting of different processes in an isolated environment and enable process's edges to allow inter process communication. In management phase of the concurrency based application PaaS should be able to orchestrate the chain of processes defined during the development phase. The main intent of this dissertation is to provide a PaaS solution for concurrency based applications provisioning in IoT to solve the challenges as mentioned above. The major contributions of the thesis are in twofold. First we propose a PaaS architecture for concurrency based applications provisioning in IoT. Second we provide a proof of concept in which a prototype is built using as basis Cloud Foundry an existing PaaS platform and TelosB as the IoT Infrastructure devices. The performance measurements have also been made to validate the results claimed.

Comparing Open Source Paas Frameworks Cloud Foundry And Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Comparing Open Source Paas Frameworks Cloud Foundry And free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Comparing Open Source Paas Frameworks Cloud Foundry And free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles

or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Comparing Open Source Paas Frameworks Cloud Foundry And free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading Comparing Open Source Paas Frameworks Cloud Foundry And. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Comparing Open Source Paas Frameworks Cloud Foundry And any PDF files. With these platforms, the world of PDF downloads is just a click away.
