The Cloud has grown; it represents the consummate disruptor to structure a pervasive social and economic network that will soon connect and define more of the world than any other political, social, or economic organization. The Cloud is the first megatrend of the twenty-first century, one that will shape the way we will address virtually every challenge we face for at least the next 100 years. It is where we will all live, work, and play in the coming decades. The Cloud is where your kids go to dive into online play. It is where you meet and make friends in social networks. It is where companies find the next big idea. It is where political campaigns are won and lost. **Cloud Surfing** is the groundbreaking book that will explain how to access the full value of the Cloud and how to embrace its possibilities. *A Quick Start Guide to Cloud Computing* Mark I. Stallmann founder of Free Software Foundation and creator of the computer operating system GNU GNU's Not Unix quoted in The Guardian about Cloud Computing paradigm on September 29 2008 Without any doubts Cloud Computing is THE current buzzword in the information and telecommunication industry since 2007 The hype around Cloud Computing is impressive but also confusing as Stallmann's quotation reveals Among various market research institutes governmental agencies of different countries or business consultancies the market of Cloud Computing services will increase immensely For example Forrester Research predicts that the global market from 40.7 billion in 2010 will rise to 241 billion per year by 2020 Ried Kisker 2011 p 3 The existence and enormous growth of the Cloud Computing services is obvious but mere the fact what exactly is Cloud Computing still occurs for confusion The scholars around Armbrust et al 2010 quoted Larry Ellison CEO of Oracle The interesting thing about Cloud Computing is that we've redefined Cloud Computing to include everything that we already do I don't understand what we would do differently in the light of Cloud Computing other than change the wording of some of our ads The term Cloud Computing is used in the Information Technology IT industry and research area for about four years and is considered as the next revolution of the IT sector Although the phenomenon of Cloud Computing is still in its infant stage it is considered to be a strategic change point of information technology Chorafas 2011 p 58 Among many scholars Cloud Computing is seen as an innovation of computing Koch and Breul 2009 discuss If industry analysts are correct we are at an inflection point a true paradigm change in the evolution of computing The evolution process of Cloud Computing is diversified and will be discussed in more detail in the subsequent section 2.4 of this paper The main problem remains about Cloud Computing paradigm is a widely accepted definition of Cloud Computing services Vaquero et al 2009 Hence even for service providers and consumers it is difficult to delimit the area of Cloud Computing services

Cloud Computing Charles Henson,2012-03-01 The reason I published this book was to fortify business owners and executives with the basic knowledge they need to make a great decision when choosing a Cloud Computing Integrator I believe a qualified computer consultant can contribute to your business success just like a great marketing consultant attorney accountant or financial advisor can The technology industry is ever changing and growing at such a rapid pace that most business owners can't keep up with all the latest whiz bang gadgets alphabet soup acronyms and choices available to them Plus many of the latest and greatest technological developments have a shelf life of six months before they become obsolete or completely out of date Sorting through this rapidly moving mess of information to formulate an intelligent plan for growing a business requires a professional who not only understands technology and how it works but also understands how people and businesses need to work with technology for progress Unfortunately the complexity of technology makes it easy for a business owner to fall victim to an incompetent or dishonest computer consultant When this happens it creates feelings of mistrust toward all technology consultants and vendors which makes it difficult for those of us striving to deliver exceptional value and service to our clients Therefore my purpose is to not only give you the information you need to find an honest competent computer consultant but in doing so to raise the standards and quality of services for all consultants in my industry I certainly want your feedback on the ideas in this book If you choose a Cloud Integrator as I've outlined and they work please send me your story If you've had a bad experience I want to hear those horror stories as well If you have additional tips and insights that we haven't considered please share them with me I might even use them in a future book Again the more aware you are of what it takes to find and hire great consultants in every aspect of your business not just technology the stronger your business will become I am truly passionate about building an organization that delivers uncommon service to my clients I want to help business owners see the true competitive advantages technology can deliver to your business and not just view it as an expensive necessity and source of problems
