The book's process-oriented approach is especially helpful where the focus is on long-term sustainable measures. The publication consists of two linked volumes that enable the reader to consult the systematic catalog and the case study section side by side. The easy-to-navigate structure and an extensive glossary provide further guidance while the work's highly distinctive design makes it visually appealing as well and invites the reader to leaf through and explore it.

Resilient City Elke Mertens, 2021-11-22 Climate change is one of the major challenges facing cities in the future. Landscape architecture is particularly in demand here because it offers solutions that are characterized by complexity and interdisciplinarity and contribute to the quality of everyday life. These range from green roofs and facades to urban gardening and the landscaping of large-scale protection works. This volume presents measures and plans of eleven major cities in North and South America from Vancouver to Rio de Janeiro to protect their inhabitants and their habitats against future storms, floods, landslides or long periods of heat and drought. Outstanding projects in the featured cities are analyzed in their geographic and climatic context. The author also addresses the social and cultural dimensions of resilience.

Constructing Worlds Alona Pardo, Elias Redstone, 2014 Architecture has long been a subject matter for photographers who utilize the medium not just to document the built world but also to reveal wider truths about society. This book features chapters devoted to various artists among them Berenice Abbott, Walker Evans, Ed Ruscha, Bernd and Hilla Becher, Andreas Gursky and Iwan Baan and includes 220 color and duotone images. Each chapter opens with a text introducing the artist's work followed by reproductions of their photographs. Arranged chronologically, the book documents the birth of the skyscraper against the backdrop of the Great Depression, the rise of the modernist tradition in America, post-colonial Africa and India, the effects of industry on 1960s Europe, the increasing suburbanization of America and Europe and the consequences of today's mass urbanization in Asia, the Middle East and South America. Far-reaching and penetrating, this volume reflects on the ongoing dialogue between photography and architecture.
