Contribution Of Muslim Scientists To The World:

Muslim Contributions to World Civilization M. Basheer Ahmed, MD and Ambassador Syed A. Ahsani and Dilnawaz A. Siddiqui, PhD, 2005-01-01 Islam's brilliant contributions to science, art and culture are a timeless and precious heritage which should be historically preserved for future generations. The great achievements of Muslim scholars are rarely, if at all, acknowledged in formal education and today their identity, origins and impact remain largely obscure. This collection of papers aims to give readers a brief introduction to the intellectual history of Muslims and the contributions that eminent Muslim scholars have made in certain specific fields of knowledge including basic and applied physical and biological sciences, medicine, legal and political theories and practices, economic and financial concepts, models and institutions etc. The preservation of civilization necessitates a better understanding, sharing and recognition of our common human heritage. Given today's widespread negative stereotyping and falsely generated misunderstanding of Islam and Muslims, the publication of these papers on Muslim Contributions to World Civilization is vital to help repair the wrong that is being perpetrated and restore the historical truth which is being distorted.

Science and Technology from Global and Historical Perspectives Bahattin Karagözoğlu, 2017-03-05 This book provides science and technology ethos to a literate person. It starts with a rather detailed treatment of basic concepts in human values, educational status and domains of education, development of science and technology and their contributions to the welfare of society. It describes ways and means of scientific progresses and technological advancements with their historical perspectives including scientific viewpoints of contributing scientists and technologists. The technical, social and cultural dimensions are surveyed in relation to acquisition and application of science and advantages and hindrances of technological developments. Science and Technology is currently taught as a college course in many universities with the intention to introduce topics from a global historical perspective so that the reader shall stretch his/her vision by mapping the past to the future. The book can also serve as a primary reference for such courses.

SCIENTIFIC RESEARCH AND DISCOVERIES BASED ON THE UNDERSTANDING OF QUR'AN AND UNIVERSE (IIIT) IMAD FAKHRI, TAHA ALSHAIKHLI, ROSLINA OTHMAN, NOOR AZURA ZAKARIA, 2023-06-13 This book revisits that legacy and reclaims the Qur'an as a dynamic source of inquiry, not merely a book of moral precepts but a text rich with epistemological directives. It begins with a discussion on the nature of scientific research and discovery, drawing from contemporary definitions and methodologies. The first chapter provides an overview of scientific investigation as a structured, systematic process that involves formulating questions, collecting data and constructing explanations through reasoned analysis. It highlights different research types: observational, experimental, descriptive, analytical and cross-sectional and explores their relevance in the context of Qur'an inspired scientific thinking.

History and Philosophy of Muslim Contribution to Science and Technology M. M. Qurashi, S. S. H. Rizvi, 1996 *Understanding Maqasid al-Shari'ah* Musfir bin Ali al-Qahtani, 2015-01-01 Dr Musafir bin Ali al-Qahtani's work contributes to the ever growing body of scholarly literature in the field of maqasid al-Shari'ah, higher objectives of Islamic law. Understanding Maqasid al-Shari'ah calls for the development of a juridical sense that is finely tuned to the higher objectives and purposes of Islamic rulings, the aims of which are the formulation of a new methodology in understanding the revealed texts and the reform of Muslim thought and its application. The author draws attention to the importance of understanding various levels of maqasid, including distinguishing between primary aims (al-maqasid al-asliyyah) and secondary aims (al-maqasid al-tabi'ah). Al-Qahtani asserts that a positive understanding of the objectives of the Shari'ah should produce affirming human and cultural developments in Muslim societies. The real strength of this work, however, is in the author's application of higher objectives and aims to different areas of jurisprudence such as in deriving and issuing religious rulings (ifta) and to important social issues and problems present in Muslim societies such as extremism, jihad, commanding right and forbidding wrong, social change, crisis of Muslim thought, countering religious excessiveness, the need for recreation and leisure, citizenship and nation belonging, spreading beauty and harmony in Islam, and the role of Muslim women in society.

Islam and Society Riaz Hassan, 2013-06-01 The central focus of this volume is to explore and highlight the nexus between the ideology of Islam and social and cultural milieus, with the aim of reconceptualising the sacred as a socially constructed reality and not a transcendental supernatural phenomenon. From this perspective, human agency and society become the main focus for shaping, perpetuating and institutionalising religious beliefs, ideas and practices, opening up space for empirical and sociological analyses of religious phenomena. The seven essays in this volume seek to explore and examine some of the key debates in contemporary sociology of Islam. The topics explored are social factors in the origins of Islam, social theory and Muslim society, Islam and politics in South Asia, Muslim piety, anti-Semitism, the social foundations of Muhammad's prophetic
