Conquering Maths Primary 6 , Primary English Curriculum Guide Christine Moorcroft,Ray Barker,2013-11-26 First

Published in 2001 The purpose of this curriculum guide is to help student teachers and newly qualified teachers to make a start on learning how to become competent teachers of English Despite the emphasis given in training courses to the teaching of English newly qualified teachers often feel underprepared for it and frequently mention their concerns about this These concerns can be partly explained by a general lack of confidence in this key area and partly by widespread media and political criticism of the teaching of literacy It is also because it is often difficult for a student to make the connection between observation of key teaching strategies and his or her own personal practice Master Mathematics Teachers Zhenzhen Miao,Christian Bokhove,David Reynolds,2023-08-21 This practical guide invites teachers to take a journey towards masterly mathematics teaching using the experiences and lessons learnt across five Chinese provinces Anhui Beijing Jiangsu Jiangxi and Tianjin On this journey you will gain a thorough understanding of 1 the quality and characteristics of master mathematics teachers teaching 2 the quality of mathematics learning they have nurtured amongst their students in affective metacognitive and cognitive dimensions and 3 the teaching learning mechanisms that underpin excellent performance in the three dimensions Alongside the quantitative and qualitative evidence on educational excellence you will also delve deep into the trajectories and processes of professional development that generate professional excellence amongst master mathematics teachers and their peers within and across primary schools up and down China Building on data collected with 70 master mathematics teachers and 3 178 students and from teaching research events at the school municipal provincial and national levels the Master Mathematics Teachers MasterMT project is to date the first that has looked at the legendary tribe of master mathematics teachers in China at such a large scale and with such breadth and depth The book offers invaluable insights for any teacher or teacher educator who wants to improve mathematics teaching and learning and generate educational and professional excellence in primary schools and beyond More information on the Master Mathematics Teachers MasterMT project can be accessed at <https://mastermt.org> *Progress and Performance in the Primary Classroom* Maurice Galton,Brian Simon,2023-02-03 First published in 1980 Progress and Performance in the Primary Classroom assesses the performance of primary schoolchildren in a range of study skills as well as on the more conventional tests of mathematics language use and reading The findings indicate that the more successful styles are used by the more experienced teachers who manage to increase the amount of contact with the pupils by a variety of organizational strategies While pupils who receive the greatest amount of class teaching do best on mathematics there is no evidence to suggest that the characteristics of teaching valued by critics of modern primary practice exert any significant influence on pupil progress The relationship between pupil progress and behaviour shows some remarkable patterns For example it was

found that children who work on average one day per week less than other children still make the same progress in basic skills as the others Such findings suggest that there is a need to examine how far teaching in the junior school is sufficiently stimulating and challenging while at the same time acknowledging the difficulties of improving the situation while class sizes remain relatively high This book will be of interest to students of education and pedagogy as well as to teachers
