and true tips include The single point estimate is almost always wrong so that it is always better to express judgments as  
ranges A probability distribution completely expresses someone's judgment about the likelihood of values within the range  
We often need a single value cost or other assessment and the expected value mean of the distribution is the only unbiased  
predictor Expected value is the probability weighted average and this statistical idea is the cornerstone of decision analysis  
Some decisions are easy perhaps aided by quick decision tree calculations on the back of an envelope Decision dilemmas  
typically involve risky outcomes many factors and the best alternatives having comparable value We only need analysis  
sufficient to confidently identify the best alternative As soon as you know what to do stop the analysis Be alert to ways to  
beneficially change project risks We can often eliminate avoid transfer or mitigate threats in some way Get to know the
