Einstein's Masterwork John Gribbin, 2016-09-06 In 1915 Albert Einstein presented his masterwork to the Prussian Academy of Sciences a theory of gravity matter space and time the General Theory of Relativity Einstein himself said it was the most valuable theory of my life and of incomparable beauty It describes the evolution of the universe black holes the behavior of orbiting neutron stars and why clocks run slower on the surface of the earth than in space It even suggests the possibility of time travel And yet when we think of Einstein s breakthrough year we think instead of 1905 the year of Einstein s Special Theory of Relativity and his equation $E=mc^2$ as his annus mirabilis even though the Special Theory has a narrower focus Today the General Theory is overshadowed by these achievements regarded as too difficult for ordinary mortals to comprehend In Einstein s Masterwork John Gribbin puts Einstein s astonishing breakthrough in the context of his life and work and makes it clear why his greatest year was indeed 1915 and his General Theory his true masterpiece
