whether or not to make a collision avoidance maneuver by a spacecraft with such capability The space object catalog currently contains more than 20 000 objects and when the planned space fence radar becomes operational this number is expected to exceed 100 000 A key task is to determine if objects might come closer to each other an event known as conjunction and the probability that they might collide The U S Air Force is the primary U S government organization tasked with maintaining the space object catalog and data on all space objects This is a complicated task involving collecting data from a multitude of different sensors many of which were not specifically designed to track orbiting objects and fusing the tracking data along with other data such as data from atmospheric models to provide predictions of where objects will be in the future The Committee for the Assessment of the U S Air Force s Astrodynamics Standards collected data and heard from numerous people involved in developing and maintaining the current astrodynamics standards for the Air Force Space Command AFSPC as well as representatives of the user community such as NASA and commercial satellite owners and operators Preventing collisions of space objects regardless of their ownership is in the national security interested of the United States Continuing Kepler s Quest makes recommendations to the AFSPC in order for it to create and expand research programs design and develop hardware and software as well as determine which organizations to work with to achieve its goals *Astrodynamics* ,2000 [AIAA 92-4361 - AIAA 92-4517](#) ,1992 *Spaceflight Mechanics 1994* John E.
