Winer, 2014-05-22 Although coercion is a fundamental and unavoidable part of our social lives economists have not offered an integrated analysis of its role in the public economy The essays in this book focus on coercion arising from the operation of the fiscal system a major part of the public sector Collective choices on fiscal matters emerge from and have all the essential characteristics of social interaction including the necessity to force unwanted actions on some citizens This was recognized in an older tradition in public finance which can still serve as a starting point for modern work The contributors to the volume recognize this tradition but add to it by using contemporary frameworks to study a set of related issues concerning fiscal coercion and economic welfare These issues range from the compatibility of an open access society with the original Wicksellian vision to the productivity of coercion in experimental games [The SAGE Handbook of Governance](#) Mark Bevir, 2010-12-14 The study of governance has risen to prominence as a way of describing and explaining changes in our world The SAGE Handbook of Governance presents an authoritative and innovative overview of this fascinating field with particular emphasis on the significant new and emerging theoretical issues and policy innovations The Handbook is divided into three parts Part one explores the major theories influencing current thinking and shaping future research in the field of governance Part two deals specifically with changing practices and policy innovations including the changing role of the state transnational and global governance markets and networks public management and budgeting and finance Part three explores the dilemmas of managing governance including attempts to rethink democracy and citizenship as well as specific policy issues such as capacity building regulation and sustainable development This volume is an excellent resource for advanced students and researchers in political science economics geography sociology and public administration Mark Bevir is a Professor of Political Science at the University of California Berkeley **The**

their attempts to promote the public interest This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War Endocrine Disruptors and Carcinogenic Risk Assessment Lech Chyczewski, Jacek Niklinski, Eric Pluygers, 2002
