TESTIMONIALS Readers Respond I feel that I have been very fortunate to have used Dr Dachslager s book I am an RN who had gone back to school to learn how to do research in my field of cardiovascular nursing During the first semester of my nursing research class I was at a loss of how to incorporate a statistical model into my research paper While studying this book I found a model that was easy for me to understand and thus helped make my paper more clear I received an A on my paper Need I say more Thank you Dr Dachslager Frankie Besch RN Indianapolis Indiana I have terrible math anxiety and when I first purchased my copy of the textbook I was seriously asking myself what I was getting myself into As the semester started out I began to realize how easy the text was to read since it followed the lectures virtually word for word The book s self teaching format was also easy to follow No matter how confusing I thought a problem was I could always figure it out by referring back to the previous section of the chapter to get clarification and answers to my questions Using this textbook is like having the instructor sitting next to you the whole time you are working from it I wish that all math books made math as tangible and doable as this one Lauren Mirallegro Student Saddleback College Statistics and Probability theory by Howard Dachslager is indeed the best math book I ve ever studied

from When I m studying from this book it feels like I ve hired a tutor because every problem is shown step by step I just love how the book matches its example problems with practice problems because when I run into practice problems I don t understand I can always rely on going back to the example problems With this book in hand I don t think anyone really needs to go to class to learn statistics because the book is so easy to comprehend and learn from To be honest if you own this book you will definitely find it easy and fun Tina Chen Student Irvine Valley College
