*When There Are No Words* ,2017-01-24 This book intended for clinicians treating very early trauma and neglect in the attachment period integrates several treatment strategies in a comprehensive and resonant approach that is attuned to the client s unspoken early experience Although the book presumes EMDR training it has considerable application for other clinicians who deal with the pernicious effects of early trauma and neglect in the attachment period The book is based on the seminal contributions of Katie O Shea and integrates the author s understanding of complex trauma dissociative disorders and the neurobiology of traumatic dissociation including Panksepp Porges Schore and others It draws upon the somatic therapy traditions of Peter Levine and others for accessing the somatically held unprocessed trauma responses Although primarily for clinicians the cartoons are also suitable for use with clients Like the author s first book on dissociation the lay public will be interested in the book because its cartoons make the information comprehensible The early trauma approach in its basic form consists of 1 containment 2 safe state 3 resetting hardwired subcortical affective circuits and 4 clearing trauma by time frame for temporal integration For complex cases each step has ego state variations and there are more preparatory steps to ensure the self system is aligned with treatment goals It integrates ego state work to reduce loyalty to the aggressor and the problem of perpetrator introjects The author was a

collaborator of the late father of ego state therapy John G Watkins Ph D Sandra Paulsen offers a third integration approach temporal integration to supplement the tactical integration and strategic integration approaches of Catherine Fine Ph D and Richard Kluft M D respectively The book has over a hundred original drawings by the author which telegraph complex psychological and neurobiological concepts quickly making the book a quicker read than would otherwise be possible The format with its generous use of bullets white space and cartoons mean that a range of readers can scan the chapters for the information relevant to their own needs Appendices provide detailed information on the mechanics of the work how to ethically work in the intensive format containment procedures for complex cases working with perpetrator introjects Although the book is informal with its use of cartoons the book includes relevant scholarly citations and references Because it is both metaphoric and scholarly it speaks to both the right and left hemisphere s of the reader s brain Many concepts will slip in unawares through the compelling use of metaphor The book includes case examples to illustrate the suggested scripting for accomplishing each of the relevant steps Narrative discussion describes the most likely problems for each step and what to do about them Katie O Shea M S is acknowledged as contributing author because of her development of the original approach and some of the ideas contained in the book Ulrich Lanius Ph D contributed to the neurobiological understandings in the book Above all the author s goal is to help others understand how the story tells itself non verbally when trauma occurs in the attachment period and is held in implicit memory When we hear of the story in the non verbals clinicians can catch and release the traumatic sequelae of very early trauma and neglect The book includes worksheets for clinicians use It supplements the online workshops that Dr Paulsen presents on this same topic and others see [www.bainbridgepsychology.com](http://www.bainbridgepsychology.com)
